Two-Dimensional Systems: Physics and New Devices Günther Bauer, Friedemar Kuchar, Helmut Heinrich, 2013-06-29 In the series of International Winter Schools on New Developments in Solid State Physics the fourth one was devoted to the subject Two Dimensional Systems Physics and Devices For the second time the proceedings of one of these Winter Schools appear as a volume in the Springer Series in Solid State Sciences the earlier proceedings were published as Vol 53 The school was held in the castle of Mauterndorf Salzburg Austria February 24 28 1986 These proceedings contain contributions based on the thirty invited lectures The school was attended by 179 registered participants 40% students who came from western European countries the United States of America Japan the People's Republic of China and Poland As far as the subjects are concerned several papers deal with the growth and characterization of heterostructures Dynamical RHEED techniques are described as a tool for in situ studies of MBE growth mechanisms Various growth techniques including MBE MOMBE MOCVD and modifications of these are discussed The limiting factors for the carrier mobilities and the influence of the spacer thickness in single heterostructures of GaAs GaAlAs seem to be understood and are no longer a matter of controversy In addition the growth of two fascinating systems Si/SiGe and Hg_{1-x}Cd_xTe is discussed in detail

Parallel Programming, Models and Applications in Grid and P2P Systems Fatos Xhafa, 2009-06-15 The demand for more computing power has been a constant trend in many fields of science engineering

and business Now more than ever the need for more and more processing power is emerging in the resolution of complex problems from life sciences financial services drug discovery weather forecasting massive data processing for e science e commerce and e government etc Grid and P2P paradigms are based on the premise to deliver greater computing power at less cost thus enabling the solution of such complex problems Parallel Programming Models and Applications in Grid and P2P Systems presents recent advances for grid and P2P paradigms middleware programming models communication libraries as well as their application to the resolution of real life problems By approaching grid and P2P paradigms in an integrated and comprehensive way we believe that this book will serve as a reference for researchers and developers of the grid and P2P computing communities Important features of the book include an up to date survey of grid and P2P programming models middleware and communication libraries new approaches for modeling and performance analysis in grid and P2P systems novel grid and P2P middleware as well as grid and P2P enabled applications for real life problems Academics scientists software developers and engineers interested in the grid and P2P paradigms will find the comprehensive coverage of this book useful for their academic research and development activity **Technical Reports Awareness Circular : TRAC.**
