Sea Change Pacific Asia As The New World Industrial Center:

Sea Change James C. Abegglen, 1994 This brilliant analysis of East Asian politics and markets shows why this vast region comprising Japan Korea Taiwan Singapore Malaysia Indonesia Thailand the Philippines and coastal China of eight hundred million increasingly affluent consumers constitutes the largest and fastest growing market in the world for Western goods and services Illustrations Comprehensive Security in Asia ,2000-04-27 The term comprehensive security was first used by the late Japanese prime minister Ohira but the concept as such can be traced back to Japanese thinking on security during the fifties Its meaning goes far beyond requirements of military defence against a particular enemy and stresses the need to take into account other aspects vital to national stability food energy environment communication and social security While not denying the importance of military security it explicitly encompasses a wide range of other aspects the search for environmental security for instance which requires cooperation with other countries including hypothetical enemies The concept stresses the need for confidence building methods as a requirement for its attainment and pertains to issues such as preventive diplomacy energy security second order cybernetics greater transparency of international financial markets as means to enhance overall stability It is a notion that goes beyond simplifications such as us and them Since the word has been first coined in Japan it has caught on in other Asian countries as well It has become clear that the concept is particularly suited for a continent where large and powerful countries such as China Korea Japan and Indonesia are unlikely to enter into close cooperation along the model of the European Union In short in this volume a team of scholars from Asia Europe and the United States provide clear analyses of issues vital to Asian politics an important contribution to one of the key issues of contemporary Asian politics Routledge Handbook of International Political Economy (IPE) Mark Blyth, 2009-06-02 Providing an overview of the range and scope of International Political Economy scholarship this important work maps the different regional schools of IPE and notes the distinctive way IPE is practiced and conceptualized around the world

Contemporary Issues Shaping China's Civil Aviation Policy Alan Williams, 2016-05-13 The emergence of China as a future major participant in international aviation raises some interesting questions especially from a strategic policy perspective The progressive shift from a command to a mixed market economy under the central leadership of the Beijing administration now finds itself faced with the needs to balance a strategic duality in the context of the role of China's civil aviation industry In a very real sense this situation requires the design and accommodation of a growing role for China's mainstream carriers within the operational context of the need to meet the complex challenges from increasing international market competition In parallel with such major external pressures central government must also accommodate domestic priorities with regard to internal economic development The fruits of economic progress as a function of market reform are commonly understood to have positively reshaped the lives of only a proportion of the national population to date The need to create greater access to economic growth for the more remote western and northern provinces has required that the rapid development of airports

become a factor in the planning and allocation of developmental priorities To complicate matters further prevailing requirements of airspace defence remain a major parameter within the larger context of national aviation policy This book explores the political economic and strategic issues raised by the inevitable tension between the domestic and international aspects of Beijing s current civil aviation strategy It also seeks to identify some of the problems that face the industry as a key sector in the larger context of macroeconomic reform and the further pressures now being exerted by China s

membership of the WTO **Kimono in the Boardroom** Jean R. Renshaw,1999-09-23 Japanese women who comprise more than 40% of their country s workforce are essential to the Japanese economy Yet they are not typically thought of as managers at home or abroad Jean Renshaw challenges that perception in this pathbreaking book showing readers where and how an invisible evolution is occurring in Japanese business Traditional norms of lifetime employment the seniority system and the bureaucratic tightly knit nature of Japanese industry all restrict women s entry into management Despite these enormous barriers the number of Japanese women managers has almost doubled in the last ten years In an effort to discover the secrets of their success Renshaw interviewed over 150 successful Japanese women managers She explored family backgrounds personal characteristics socialization professional experiences and corporate cultures This book presents her sometimes surprising discoveries Renshaw completes the picture by surveying the history of Japanese women in management and discussing the even newer phenomenon of Japanese women who own their own businesses An eye opening work for managers of international firms and scholars of business and women s studies Kimono in the Boardroom reveals the potential of the rising female managerial class to profoundly change the male dominated culture of modern Japan

Cross-Cultural Differences - Japanese and German Management Styles from the German Perspective Markus Richwien,2002-08-07 Inhaltsangabe Abstract As the idea of Japan as a leader in management styles and the mythos collectivism as a key to high quality performance and productivity is still in mind of German managers this work tries to compare actual leadership styles of Japanese and German managers on the level of cultural dimensions In the study the sample consisted of 119 persons in middle management positions 82 male and 37 female 60 persons with work experience in Japan and 59 without experience Participants were asked to complete a questionnaire regarding 52 leadership characteristics e g the ability to assert oneself to cooperate or to delegate within five cultural dimensions Participants then rated the importance of this characteristic for the specific category Findings of the study showed significant differences in experienced and estimated management styles between the countries as well as significances regarding management traits of the german culture after working in Japan Inhaltsverzeichnis Table of Contents CHAPTER ONE9 1 1INTRODUCTION9 1 2STATEMENT OF THE PROBLEM11 1 3RESEARCH QUESTION14 CHAPTER TWO15 2 1INTERNATIONAL MANAGEMENT AND ITS CULTURAL CONTEXT15 2 1 1Culture15 2 1 2Cross cultural Communication22 2 2 2Cross cultural Management25 2 2 3Significance for Organization29 2 3SUCCESS FACTORS OF INTERNATIONAL BUSINESS31 2 4CULTURALLY
