Sea Remains:

The Future of Sea Power Eric Grove, 2021-05-30 This book first published in 1990 presents a fundamental reassessment of maritime strategy. It analyses the lessons of twentieth century naval warfare and examines in detail the changing face of naval warfare both in terms of the weapons used and the platforms from which they are launched and controlled. It looks at the evolving uses of the seas both economic and military and sets sea power against the developing world environment political, legal and economic, discussing those factors that stimulate nations to exert power at sea and those that limit their naval capabilities. It also develops a theoretical framework for future thinking about maritime strategy and forces, revises and updates Mahan's classical analysis of the foundations of sea power and discusses thinking about naval tasks. **The Baltic and the North Seas** Merja-Liisa Hinkkanen, David Kirby, 2013-06-17 Exploring the themes of the human relationship with the marine environment and the ways in which the peoples of Northern Europe have experienced and exploited their seas, this book reveals how human perception of the northern seas has changed over time. Drawing on a wide variety of sources from Denmark and Britain to Norway, Finland and Germany, *The Baltic and the North Seas* is an insightful and colourful history of the politics, economy and culture of this intriguing region. **The Bible as History** Werner Keller, 1995 *The Bible As History* by Werner Keller will take you on a breathtaking journey to the heart of Holy Scripture as it pieces together one of the most stunning spiritual puzzles in the history of mankind. **Bibliotheca sacra**, 1855 Bibliotheca Sacra and Theological Review, 1855 *Chinese-Japanese Competition and the East Asian Security Complex* Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14 This volume examines contemporary diplomatic, economic and security competition between China and Japan in the Asia Pacific region. The book outlines the role that Sino-Japanese competition plays in East Asian security, an area of study largely overlooked in contemporary writing on Asian security which tends to focus on US-China relations and/or US hegemony in Asia. The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinz Abe and regional security dynamics within and between Asian states and institutions since 2012. It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region. In doing so, the volume draws on a levels of analysis approach to demonstrate the value in looking at security in the Asia Pacific from a regional rather than global perspective. The vast majority of existing research on the region's security tends to focus on great power relations and treats Asia as a sub-region within the larger global security architecture. In contrast, this volume shows how competition between the two largest Asian economies shapes East Asia's security environment and drives security priorities across Asia's sub-regions. As such, this collection provides an important contribution to discussion on security in Asia, one with potential to influence both political and military policy makers, security practitioners and scholars. This book will be of much interest to students of Asian politics, regional security, diplomacy and international relations. *Two Years in a Gulag* Frank Pleszak, 2013-02-15 The true story of a Polish peasant exiled to the
