A Maritime History of Bath, Maine and the Kennebec River Region William A. Baker, 1973

A Boston Schooner in the Royal Navy, 1768-1772 Phillip Reid, 2023 Uses rare surviving records including fully intact logbooks to situate the customs enforcement interceptor Sultana within the wider picture of the British Atlantic in this crucial period HONORABLE MENTION 2023 Lyman Book Award for North American Naval History

The small Boston built schooner Sultana served as a customs enforcement interceptor on the North American eastern seaboard in the period leading up to the American Declaration of Independence when British taxation of American trade was a hugely contentious issue As a typical workaday British American merchant ship taken into naval service Sultana offers a rare opportunity to understand a technology of paramount importance to this world where records for merchant ships are scarce but where in this case a wealth of information from plan drawings to the fully intact logbooks has survived The book provides a detailed narrative of the ship s activities and reveals the nature of life on board and the day to day business of operating a small sailing ship It explores the technology of the ship and her sailing qualities as revealed by the ship s logs and also by the performance of a modern replica In addition the book situates Sultana s role within the wider picture of the British Atlantic in this crucial period It is thereby both naval microhistory and also Atlantic history for all scholars interested in the formation and development of the British Atlantic world

Cultural Economies of the Atlantic World Victoria Barnett-Woods, 2020-04-08 Cultural Economies explores the dynamic intersection of material culture and transatlantic formations of capital in the long eighteenth century It brings together two cutting edge fields of inquiry Material Studies and Atlantic Studies into a generative collection of essays that investigate nuanced ways that capital material culture and differing transatlantic ideologies intersected This ambitious provocative work provides new interpretive critiques and

methodological approaches to understanding both the material and the abstract relationships between humans and objects including the objectification of humans in the larger current conversation about capitalism and inevitably power in the Atlantic world Chronologically bracketed by events in the long eighteenth century circum Atlantic these essays employ material case studies from littoral African states to abolitionist North America to Caribbean slavery to medicinal practice in South America providing both broad coverage and nuanced interpretation Holistically Cultural Economies demonstrates that the eighteenth century Atlantic world of capital and materiality was intimately connected to both large and small networks that inform the hemispheric and transatlantic geopolitics of capital and nation of the present day

[Merrimack, The Biography of a Steam Frigate](#) Stephen Chapin Kinnaman, 2019-03-31 Merrimack is the biography of a warship the U S Steam Frigate Merrimack Her name has long been linked to the first duel of ironclads an epic Civil War battle fought at Hampton Roads between the Monitor and Merrimack But over time the myth of the Merrimack actually the C S S Virginia displaced the memory of a magnificent antebellum U S Navy warship The steam

frigate Merrimack lost her identity Nearly forgotten is the story of the original Merrimack the namesake of a class of six powerful war steamers When built she was the largest vessel in the U S Navy the nation s first screw propelled frigate and the earliest major warship to be armed entirely with shell firing guns Her first commission took her on a tour of the principal naval stations of Europe During her second commission she served as flagship of the Navy s Pacific Squadron cruising the shores of Chile Peru Panama Hawaii Mexico and Nicaragua Through the copious use of Merrimack s deck logs official correspondence contemporary newspapers and journals and original construction plans the author s research illuminates the mechanical issues and human interactions that indelibly shaped Merrimack s brief career The author provides an unparalleled glimpse into the day to day events that defined the life of an active antebellum warship But Merrimack offers more than just a summary of the ship s operational life The author a professional naval architect and marine engineer dissects the origins of her design and compares the Merrimack class steam frigates to contemporary U S and British warships He also examines the controversy surrounding her troubled engines documenting their performance using archived drawings and steam log data In summary Merrimack embraces the many threads of a bygone era history biography geography and technology and has woven them together in telling of the story of the U S Steam Frigate Merrimack

Hamilton,2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology *Piracy and the English Government 1616-1642* David D. Hebb,2016-12-05 Piracy and the English Government 1616 1642 explodes the myth that England was a nation of pirates arguing that the English people were far more often victims of piracy The costs to the economy and society resulting from piracy which are critically examined here for the first time reveal that not only were hundreds of English ships lost to pirates in the period but an astonishing number of men women and children approximately

8 000 were carried away to Barbary by pirates and sold into slavery The response of the government to these losses which posed significant political problems for the early Stuart government are explored and related to broader political concerns and influences

John Lenthall: The Life of a Naval Constructor Stephen Chapin Kinnaman, 2022-06-07

Many stirring words have been written about the heroic deeds of the officers and men of the U S Navy before during and after the Civil War But very little has been published about the naval constructors who built the warships that made their exploits possible Of all of the Navy's constructors from this era none had more impact than John Lenthall 1807 1882 A native of Washington D C and the son of ambitious English parents young Lenthall's stellar rise through the ranks of naval constructors soon led to his appointment as the chief of the Bureau of Construction Equipment and Repairs Now the U S government's highest ranking naval architect John Lenthall was in charge of designing and constructing the nation's warships The magnificent Merrimack class steam frigates were one of his first achievements His stance early in the Civil War on ironclads and coolness toward John Ericsson have been consistently misunderstood Lenthall accepted the Navy's need for armored warships but objected to a fleet of only brown water capable monitors When he retired in 1871 he had been bureau chief for over seventeen years and responsible for the building of nearly all the Navy's ships during an era of unprecedented technological evolution John Lenthall The Life of a Naval Constructor is thoroughly documented with previously untapped primary archival source material from Philadelphia's Independence Seaport Museum and the Franklin Institute and the U S Naval Academy Museum John Lenthall is written by a historian and naval architect who can clearly explain the nuances of ship design The author's treatment of Lenthall and the legacy of his fellow constructors brings to life a previously untold chronicle of American ingenuity and achievement
