Searching For The Green:

The Search for Political Community Paul Lichterman, 1996-09-19 This book challenges the myth that Americans emphasis on personal fulfilment necessarily weakens commitment to the common good Drawing on extensive participant observation with a variety of environmentalist groups Paul Lichterman argues that individualism sometimes enhances public political commitment and that a shared respect for individual inspiration enables activists with diverse political backgrounds to work together This personalised culture of commitment has sustained activists working long term for social change The book contrasts personalised politics in mainly white environmental groups with a more traditional community centred culture of commitment in an African American group The untraditional personalised politics of many recent social movements invites us to rethink common understandings of commitment community and individualism in a post traditional world **House Of**

December Richard David Kennedy, *The South Western Reporter*, 1923 Includes the decisions of the Supreme Courts of Missouri Arkansas Tennessee and Texas and Court of Appeals of Kentucky Aug Dec 1886 May Aug 1892 Court of Appeals of Texas Aug 1892 Feb 1893 Jan Feb 1928 Courts of Civil and Criminal Appeals of Texas Apr June 1896 Aug Nov 1907 Court of Appeals of Indian Territory May June 1927 Jan Feb 1928 Courts of Appeals of Missouri and Commission of Appeals of Texas

Years And Fears Apart Richard David Kennedy, 2014-11-30 YEARS AND FEARS APART is a new release consisting of two previous House Of December and Philippias and a study of the poet s constructs regarding life s big questions While he personally has become more cynical and sardonic as expressed in other genres such as his novels his poetic views and values had remained very much the same and this is good news for those who will appreciate his idealistic notions and his inimitable way of expressing them Thinkers in particular are going to have a feast New compositions have been added that are sure to enhance the reader s enjoyment **Philosophy and Logic In Search of the Polish Tradition** Jaakko Hintikka, Tadeusz

Czarnecki, K. Kijania-Placek, Tomasz Placek, Artur Rojszczak, 2013-06-29 On the occasion of his sixtieth birthday we dedicate this volume to Jan Wo leriski s our teacher our colleague our friend Both of us are particularly indebted to Jan not only with regards to profes sional matters but some private ones as well Hence we hope that he forgives us an occasional lapse into fondness and affection That said may the list of his personal merits remain shrouded in mystery rather than unveil them we open here by appraising Jan s presence from a broader perspective Tonote that Jan was not always a part of our lives would not evoke surprise However to imagine the Institute of Philosophy on Grodzka Street or Krakow philosophy without him in it would be a harder task at least for us Nonethe less we do remember the days when he was commuting to Krakow as a guest lecturer Is there anything about those days which particularly comes to mind To shed light on the story which follows one must begin by stating that the early 1980s when we were studying philosophy was not a bright period The great masters of Krakow philosophy Ingarden Mehlberg Zawirski or Dambska were either dead or for political reasons kept silent The years following Martial Law 1981 1983 were intellectually very blighted and barren In the midst of all this we were attending Jan s

course on general methodology **The Search for ExtraTerrestrial Intelligence** Stelio Montebugnoli, Andrea Melis, Nicolò Antonietti, 2021-03-27 This book presents the latest knowledge of the newly discovered Earth like exoplanets and reviews improvements in both radio and optical SETI A key aim is to stimulate fresh discussion on algorithms that will be of high value in this extremely complicated search Exoplanets resembling Earth could well be able to sustain life and support the evolution of technological civilizations but to date all searches for such life forms have proved fruitless The failings of SETI observations are well recognized and a new search approach is necessary In this book different detection algorithms that exploit state of the art low cost and extremely fast multiprocessors are examined and compared Novel methods such as the agnostic entropy and high sensitivity blind signal extraction algorithms should represent a quantum leap forward in SETI The book is of interest to all researchers in the field and hopefully stimulates significant progress in the search for extraterrestrial intelligence
