## Searching For Human Origins:

*Ancestors* Donald C. Johanson, Lenora Johanson, Blake Edgar, 1994 A world renowned paleoanthropologist and author of *Lucy The Beginnings of Humankind* Donald Johanson attempts to solve the mystery of human evolution using new evidence uncovered on his recent forays into the fossil rich regions of Eastern Africa Companion volume to the upcoming Nova series 175 illus Maps

**The Wisdom of the Bones** Alan Walker, Pat Shipman, 1997-09-02 Fascinating As engaging an explanation of how scientists study fossil bones as any I have ever read John R Alden Philadelphia Inquirer In 1984 a team of paleoanthropologists on a dig in northern Kenya found something extraordinary a nearly complete skeleton of *Homo erectus* a creature that lived 1.5 million years ago and is widely thought to be the missing link between apes and humans The remains belonged to a tall rangy adolescent male The researchers called him Nariokotome boy In this immensely lively book Alan Walker one of the lead researchers and his wife and fellow scientist Pat Shipman tell the story of that epochal find and reveal what it tells us about our earliest ancestors We learn that Nariokotome boy was a highly social predator who walked upright but lacked the capacity for speech In leading us to these conclusions *The Wisdom of the Bones* also offers an engaging chronicle of the hundred year long search for a missing link a saga of folly heroic dedication and inspired science Brilliantly captures an intellectual odyssey One of the finest examples of a practicing scientist writing for a popular audience Portland Oregonian A vivid insider's perspective on the global efforts to document our own ancestry Richard E Leakey

Southern Asia, Australia, and the Search for Human Origins Robin Dennell, Martin Porr, 2014-02-24 This is the first book to focus on the role of Southern Asia and Australia in our understanding of modern human origins and the expansion of *Homo sapiens* between East Africa and Australia before 30 000 years ago With contributions from leading experts that take into account the latest archaeological evidence from India and Southeast Asia this volume critically reviews current models of the timing and character of the spread of modern humans out of Africa It also demonstrates that the evidence from Australasia should receive much wider and more serious consideration in its own right if we want to understand how our species achieved its global distribution Critically examining the Out of Africa model this book emphasises the context and variability of the global evidence in the search for human origins

**Interrogating Human Origins** Martin Porr, Jacqueline Matthews, 2019-12-06 *Interrogating Human Origins* encourages new critical engagements with the study of human origins broadening the range of approaches to bring in postcolonial theories and begin to explore the decolonisation of this complex topic The collection of chapters presented in this volume creates spaces for expansion of critical and unexpected conversations about human origins research Authors from a variety of disciplines and research backgrounds many of whom have strayed beyond their usual disciplinary boundaries to offer their unique perspectives all circle around the big questions of what it means to be and become human Embracing and encouraging diversity is a recognition of the deep complexities of human existence in the past and the present and it is vital to critical scholarship on this topic This book constitutes a starting

point for increased interrogation of the important and wide ranging field of research into human origins It will be of interest to scholars across multiple disciplines and particularly to those seeking to understand our ancient past through a more diverse lens

*In Search of Human Evolution* Michael H. Crawford, 2024 *In Search of Human Evolution* focuses on sources of funding and fieldwork in Mexico Siberia Hungary and the Aleutian Islands It reviews how the evolutionary questions were generated grant proposals submitted to specific agencies and permissions obtained from each country and community This book also includes information on how the field research was organized data collected and graduate students and post docs trained The results of each of these investigations were statistically analysed and summarized

*In Search of Origins* Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term s connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begin with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the
