**Seas at the Millennium** Charles R. C. Sheppard, 2000

State of the World's Oceans Michelle Allsopp, Stefan E. Pambuccian, Paul Johnston, David Santillo, 2008-12-16 The world's oceans cover 70% of the earth's surface and are home to a myriad of amazing and beautiful creatures However the biodiversity of the oceans is increasingly coming under serious threat from many human activities including overfishing use of destructive fishing methods pollution and commercial aquaculture In addition climate change is already having an impact on some marine ecosystems This book discusses some of the major threats facing marine ecosystems by considering a range of topics under chapters discussing biodiversity Chapter 1 fisheries Chapter 2 aquaculture Chapter 3 pollution Chapter 4 and the impacts of increasing greenhouse gas emissions Chapter 5 It goes on to explore solutions to the problems by discussing equitable and sustainable management of the oceans Chapter 6 and protecting marine ecosystems using marine reserves Chapter 7 Presently 76% of the oceans are fully or over exploited with respect to fishing and many species have been severely depleted It is abundantly clear that in general current fisheries management regimes are to blame for much of the widespread degradation of the oceans Many policy makers and scientists now agree that we must adopt a radical new approach to managing the seas one that is precautionary in nature and has protection of the whole marine ecosystem as its primary objective This ecosystem based approach is vital if we are to ensure the health of our oceans for future generations

spectrum of researchers and practitioners in geodesy and geophysics The convenient location of the main building of the Hungarian Academy in downtown Budapest and the superb efforts of the Local Organizing Committee contributed in a major way to the excellent atmosphere of the meeting As at previous meetings the scientific part of the program was organized as a series of symposia which as a whole gave a broad overview of actual geodetic research activities To emphasize an integrated view of geodesy the symposia did not follow the pattern of the IAG Sections but focussed on current research topics to which several IAG Sections could contribute Each symposium had 5 sessions with presented papers and poster sessions on two consecutive days
