Annual Report on Sarawak for the Year ... ,1947 Afterlife of Empire Jordanna Bailkin,2012-11-15 This book investigates how decolonization transformed British society in the 1950s and 1960s and examines the relationship between the postwar and the postimperial Biology Pamphlets ,1912 *Sarawak Gazette* Sarawak,1926 *Popular Science Monthly* ,1915 **Science & Emotions after 1945** Frank Biess,Daniel M. Gross,2024-05-31 Through the first half of the twentieth century emotions were a legitimate object of scientific study across a variety of disciplines After 1945 however in the wake of Nazi irrationalism emotions became increasingly marginalized and postwar rationalism took central stage Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex or as a concern of the private sphere So why by the 1960s had the study of emotions returned to the forefront of academic investigation In *Science and Emotions after 1945* Frank Biess and Daniel M Gross chronicle the curious resurgence of

emotion studies and show that it was fueled by two very different sources social movements of the 1960s and brain science A central claim of the book is that the relatively recent neuroscientific study of emotion did not initiate but instead consolidated the emotional turn by clearing the ground for multidisciplinary work on the emotions Science and Emotions after 1945 tells the story of this shift by looking closely at scientific disciplines in which the study of emotions has featured prominently including medicine psychiatry neuroscience and the social sciences viewed in each case from a humanities perspective

[Borneo Studies in History, Society and Culture](#) Victor T. King,Zawawi Ibrahim,Noor Hasharina Hassan,2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences with the weight of attention devoted to anthropological research and related fields such as development studies gender studies environmental studies social policy studies and cultural studies Some of the chapters in this book are

extended versions of presentations at the Borneo Research Council's international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012. The volume examines some of the major debates and controversies in Borneo Studies including those which have served to connect post-war research on Borneo to wider scholarship. It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself. The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region. In particular, there is an examination of research materials published in the vernacular, notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak. In doing so, the book also addresses the urgent matters which have not received the attention they deserve, specifically subjects, themes and issues that have already been covered but require further contemplation, elaboration and research, and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies. The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region.

Emergence and Diversity of Modern Human Behavior in Paleolithic Asia Yousuke Kaifu, Masami Izuhara, Ted Goebel, Hiroyuki Sato, Akira Ono, 2015-02-15. Despite the obvious geographic importance of eastern Asia in human migration, its discussion in the context of the emergence and dispersal of modern humans has been rare. *Emergence and Diversity of Modern Human Behavior in Paleolithic Asia* focuses long overdue scholarly attention on this under-studied area of the world. Arising from a 2011 symposium sponsored by the National Museum of Nature and Science in Tokyo, this book gathers the work of archaeologists from the Pacific Rim of Asia, Australia and North America to address the relative lack of attention given to the emergence of modern human behavior as manifested in Asia during the worldwide dispersal from Africa.
