**The Printing Press as an Agent of Change** Elizabeth L. Eisenstein,1980-09-30 A full scale historical treatment of the advent of printing and its importance as an agent of change first published in 1980 [Printing History and Cultural Change](#) Richard Wendorf,2022 This study provides one of the most detailed and comprehensive examinations ever devoted to a critical transformation in the material substance of the printed page it carries out this exploration in the history of the book moreover by embedding these typographical changes in the context of other cultural phenomena in eighteenth century Britain The gradual abandonment of pervasive capitalization italics and caps and small caps in books printed in London Dublin and the American colonies between 1740 and 1780 is mapped in five year increments which reveal that the appearance of the modern page in English began to emerge around 1765 This descriptive and analytical account focuses on poetry classical texts Shakespeare contemporary plays the novel the Bible the Book of Common Prayer sermons and religious writings newspapers magazines anthologies government publications and private correspondence it also examines the reading public canon formation editorial theory and practice and the role of typography in textual interpretation These changes in printing conventions are then compared to other aspects of cultural change the adoption of the Gregorian

calendar in 1752 the publication of Johnson's Dictionary in 1755 the transformation of shop signs and the imposition of house numbers in London beginning in 1762 and the evolution of the English language and of English prose style This study concludes that this fundamental shift in printing conventions was closely tied to a pervasive interest in refinement regularity and standardization in the second half of the century and that it was therefore an important component in the self-conscious process of modernizing British culture publisher's website
