Velociraptor KidCaps,2012 There were plenty of giant animals around during the Age of Dinosaurs This epoch ended 65 million years ago when a huge meteor hit the Earth and ushered in our current Age of Mammals The Age of Dinosaurs saw herds of Triceratops move through what would become the western United States eating ferns cycads and other exotic Cretaceous plants Tyrannosaurus rex one of the most powerful huge meat eaters ever to live on Earth lived in the same place at the same time The smaller dinosaurs could be just as strange and interesting though One of these is velociraptor a small dinosaur that lived in Mongolia at the eastern end of the Old World just across the Bering Strait from what s now Alaska Velociraptor is famous because of the Jurassic Park books and movies but the real velociraptor even though it was a meat eater wasn t as big or dangerous as the ones that appear in the movies In this book you ll learn all about what made this massive giant great from what they looked like and ate to where they lived and what they did all day KidCaps is an imprint of BookCaps each month we are adding more history books just for kids to our library Stop by our website to learn more

Sustainable Development in Western China Scott A. Waldron, John William Longworth, Colin G. Brown,2014-05-14 This study provides a guide to analysis of the intricate web of policies institutions that now impact on grassland degradation sustainable development in China s pastoral region It also reveals broader insights into how China grapples with complex ecological livelihood problems as it rapidly modernises develops Stay Cool Holger Koch-Nielsen,2013-06-17 In hot dry or warm humid climates more than half of the urban peak load of energy consumption is used to satisfy air conditioning demands alone Since the urbanization rate in developing countries is extreme the pressure placed on energy resources to satisfy the future requirements of the built environment will be great unless new more cost effective measures can be introduced Stay Cool is an essential guide for planning and design using active design principles and passive means to satisfy human comfort requirements specifically in these climate zones based on examples of traditional and modern constructions The book demonstrates how a design strategy for urban environments and individual buildings incorporating naturally occurring resources and specific energy efficient technologies can create a location form and structure that promote significant energy savings Such strategies can be applied to low cost housing or indeed to any other buildings in order to improve comfort with passive means and low energy budgets Following an outline of climatic issues characteristics and

thermal comfort requirements the book details the available techniques and technologies that can be used to shape both built and external environments the building envelope material selections and natural ventilation and cooling methods to satisfy both human requirements and the need for energy efficiency It also includes an active design checklist and summary of available design checking tools a rehabilitation guide for existing urban building and external environments and solar charts Planners architects engineers technicians and building designers will find Stay Cool an inspirational guide and an essential reference when working with planning and design of the built environment in hot dry and warm humid climate zones It will also be of benefit to students academics and researchers with an interest in sustainable and energy efficient architecture techniques and practice
