

7 Stages of Grief

(Modified Kubler-Ross Model)

Shock*

- Initial paralysis at hearing the bad news.

Denial

- Trying to avoid the inevitable.

Anger

- Frustrated outpouring of bottled-up emotion.

Bargaining

- Seeking in vain for a way out.

Depression

- Final realization of the inevitable.

Testing*

- Seeking realistic solutions.

Acceptance

- Finally finding the way forward.

* This model is extended slightly from the original Kubler-Ross model, which does not explicitly include the Shock and Testing stages. These stages however are often useful to understand and to facilitate change.

Loss And Change:

Loss and Change Peter Marris, 1974 **Loss and Change (Psychology Revivals)** Peter Marris, 2014-10-10 First published in 1974 then reissued in 1986 with a long introduction by the author which developed the analysis in the light of recent theory and related it to work done in the field since its first publication The late Peter Marris shows how understanding grief can help us to understand processes of change both personal and social and to handle them with more compassion for ourselves and others He sees grieving as the working out of a psychological reintegration whose principles are essentially similar whether the structures of meaning of our life fall apart from the loss of a personal relationship of a predictable social context or of an interpretable world Marris draws on his wide ranging research to develop his argument A study of widows a description of the devastating effects of urban renewal projects on people whose familiar neighbourhoods are destroyed an analysis of the activities of tribal associations in Nigeria and reflections on the analogies between scientific and political revolutions are a few of the studies Marris weaves together in tracing the meaning of change and loss in human life Making Meaning of Loss Richard L. Hayes, 2022-10-31 Making Meaning of Loss Change and Challenge Across the Lifespan is about how change brings loss to our lives how we make meaning of loss and how our experience with loss directs our encounters with loss in the future Each loss challenges us in this way to rethink our world view to ask who we have become and to reinvent ourselves anew Taking a lifespan approach Hayes examines how we make sense of the losses that change brings in each period of our lives and how the way in which we meet the challenge that each loss brings directs our encounters with loss in the future In addition he provides suggestions for how earlier losses can become fruitful allies in encounters with change in the present and how caregivers can help others to make meaning of the loss in their lives Above all this book is about how caregivers can help others learn from the losses in their lives and to recognize what part of the past to bring along into the present in constructing a more reliable self for meeting the challenges of an uncertain future
