Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 Modern Architectural Theory is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development In this synthetic overview Harry Mallgrave examines architectural discourse within its social and political context He explores the philosophical and conceptual evolution of its ideas discusses the relation of theory to the practice of building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s Modern Architectural Theory challenges many assumptions about architectural modernism and uncovers many new

dimensions of the debates about modernism **Air-Conditioning in Modern American Architecture, 1890-1970** Joseph M. Siry, 2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into modernism s discourse of functionality profoundly shaped the work of some of the movement s leading architects such as Dankmar Adler Louis Sullivan Frank Lloyd Wright Ludwig Mies van der Rohe Gordon Bunshaft and Louis Kahn For them the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating cooling ventilating and artificial lighting Bridging the history of technology and the history of architecture Siry discusses air conditioning s technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism A monumental work by a renowned expert in American modernist architecture this book asks us to see canonical modernist buildings through a mechanical engineering oriented lens It will be especially valuable to scholars and students of architecture modernism the history of technology and American history **Suspending Modernity: The Architecture of Franco Albini** Kay Bea Jones, 2016-04-01 Franco Albini s works of architecture and design produced between 1930 and 1977 have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement A chorus of Italian voices has sung his praises none more eloquently than his protégé Renzo Piano Kay Bea Jones illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design Albini emerged from the ideology of Rationalism to produce some of Italy s most coherent and poetic examples of modern design He collaborated for over 25 years with Franca Helg and at a time when professional male female partnerships were virtually unknown His museums and installation motifs changed the way Italians displayed historic artifacts He composed novel suspension structures for dwellings shops galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities He explored new fabrication technologies from the scale of furniture to wide span steel structures yet he never abandoned the rigors of craft and detail in favor of mass production Suspending Modernity follows the evolution of Albini s most important buildings and projects even as they reveal his apprehensive attitudes about the modern condition Jones argues here that Albini s masterful use of materials and architectural expression mark an epic paradigm shift in the modern period **The Details of Modern Architecture** Edward R. Ford, 1990 Covering the period 1890 1932 this book focuses on various recognised masters

explaining the detailing and construction techniques used in their buildings Kenosis Creativity Architecture Randall S. Lindstrom,2021-03-21 Kenosis Creativity Architecture locates and explores creativity's grounding in the ancient concept of kenosis the emptying that allows creativity to happen that makes appearance possible It concretises that grounding through architecture a primal expression of human creativity critically examining for the first time kenotic instantiations evidenced in four iconic international projects works by Kahn Pei Ando and Libeskind Then in a final turn the potentiality of architecture's own emptying is probed Architect and author Randall Lindstrom draws on Western and Eastern philosophy including that of Heidegger Levinas Derrida Vattimo Nishida and Nishitani as well as on the theology of Christianity Judaism and aspects of Buddhism Hinduism and Islam Every chapter expands the argument that if responsiveness to our world is taken seriously if proper and sustainable responses are to be realised then a deeper understanding of creativity and so kenosis is essential This book opens up a way of thinking about creativity and humanity's readiness to be creative It thereby presents a crucial enquiry at the nexus of architecture philosophy and theology for researchers graduate and postgraduate students and practitioners alike A Critical History of Contemporary Architecture Elie G. Haddad,David Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **Bibliography of Art and Architecture in the Islamic World (2 vols.)** Susan Sinclair,2012-04-03 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **Architectural Graphics** Manuel A. Ródenas-López,José Calvo-López,Macarena Salcedo-Galera,2022-04-27 This book reports on several advances in architectural graphics with a special emphasis on education training and research It gathers a selection of contributions to the 19th International Conference on Graphic Design in Architecture EGA 2022 held on June 2 4 2022 in Cartagena Spain with the motto Beyond drawings The use of architectural graphics Contemporary Architecture and Urbanism in Iran M. Reza Shirazi,2018-01-02 This book presents an in depth critical analysis of the internationally recognized place specific works of three Iranian

architects Nader Ardalan Kamran Diba and Hossein Amanat during the 60s and 70s and their significant contribution to the emerging anti modernist discourse It argues that from the mid 19th century onwards architecture and urban design in Iran has been oscillated between two extremes of modernity and tradition Drawing on the theory of critical regionalism Kenneth Frampton the book critically analyses writings and works of the above mentioned architects and contends that they created a space in between which unified two extremes of tradition and modernity in a creative way Khalq i Jadid New Creation The book also contains three in depth interviews with architects to discuss their singular narrative of the creation of in between A concluding chapter addresses the promises of critical regionalist architecture and urban design in post Revolutionary Iran as well as the Middle East where the dichotomy of tradition and modernity is yet a valid account **Contemporary**

Architecture Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools

The Figure of Knowledge Sebastiaan Loosen,Rajesh Heynickx,Hilde Heynen,2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to
