Louisville Architecture And The Urban Environment:

Louisville William Morgan, 1979 Old Louisville David Dominé, 2013-04-22 A forty five square block neighborhood in the heart of Kentucky's largest city Old Louisville is among the largest and most significant historic preservation districts in America. Comprising some 1 400 structures built primarily between 1885 and 1905 it is a veritable time capsule of late Victorian and early twentieth century architecture. The broad avenues and quiet courts of this beautifully embowered space are lined with notable examples of Gothic Revival Richardsonian Romanesque Queen Anne Italianate Chateausque Second Empire and Beaux Arts dwellings typifying the style and elegance of the Gilded Age. Located just south of Louisville's business district Old Louisville arose from the expansive grounds where the great Southern Exposition amazed and inspired visitors from 1883 to 1887. Coinciding with the economic growth of this expanding river city the development of Old Louisville reflected the exuberance of its patrons and their architects as many of the designs combined various elements of diverse styles with sometimes whimsical and often strikingly delightful results. Old Louisville Exuberant Elegant and Alive takes an intimate tour of fifty residential designs from grand mansions to cozy cottages from familiar house museums and boutique hotel adaptations to private homes of charm and sophistication. Many of these residences have never been opened to the curious eyes of readers who are fascinated with old homes and interior design and intrigued by the skill and imagination necessary to rescue endangered buildings and convert them to the needs and comforts of modern living. Old Louisville is alive today with the busy activities of commerce and creativity. It is abuzz with people heading off to work at an office downtown or to a studio downstairs while next door or down the block new neighbors are hunkering down to restore an old gem from a bygone era. Street fairs and art festivals roll with the vitality of contemporary life in a historic setting and the pleasant sounds of Derby party celebrants mingle with the echoes of those now past. Old Louisville celebrates the architectural context of this remarkable neighborhood and commemorates the passion and the dedication of those who have recognized the value of its past and have sacrificed to preserve the certainty of its future.

Houses of God Peter W. Williams, 2024-04-22 Houses of God is the first broad survey of American religious architecture a cultural cross country expedition that will benefit travelers as much as scholars. Everyday America Chris Wilson, Paul Groth, 2003-03-03 As old as a roadway that was once a Native trail as new as the suburban subdivisions spreading across the American countryside the cultural landscape is endlessly changing. The study of cultural landscapes a far more recent development has also undergone great changes ever broadening deepening and refining our understanding of the intricate webs of social and ecological spaces that help to define human groups and their activities. and the city have most often functioned as opposites within Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature Contemporary Architects Muriel
