Imagination in Byzantine Art Henry Maguire,2023-05-31 The twelve studies contained in this second collection by Henry Maguire are linked together by a common theme namely the relationship of Byzantine art to the imaginary They show how art enabled the Byzantines not only to imagine the sacred events of the past but also to visualize the invisible present by manifesting the spiritual world that they could not see The articles are grouped around the following five topics the depiction

of nature by the Byzantines before and after iconoclasm especially in portrayals of the earthly and the spiritual Paradise the social functions and theological significance of classical artistic forms in Byzantine art after iconoclasm the association between rhetoric and the visual arts in Byzantium especially in contrast to the role played by liturgical drama in western medieval art the relationship of the visual arts to Byzantine concepts of justice and the law both human and divine and portrayals of the two Byzantine courts the imperial court on earth and the imagined court in heaven The papers cover a wide range of media including floor and wall mosaics paintings in manuscripts and churches ivory carvings coins and enamel work

Who's who in American Art, 1993-12 **Picture World** Rachel Teukolsky, 2020-08-16 The modern media world came into being in the nineteenth century when machines were harnessed to produce texts and images in unprecedented numbers In the visual realm new industrial techniques generated a deluge of affordable pictorial items mass printed photographs posters cartoons and illustrations These alluring objects of the Victorian parlor were miniaturized spectacles that served as portals onto phantasmagoric versions of the world Although new kinds of pictures transformed everyday life these ephemeral items have received remarkably little scholarly attention *Picture World* shines a welcome new light onto these critically neglected yet fascinating visual objects They serve as entryways into the nineteenth century's key aesthetic concepts Each chapter pairs a new type of picture with a foundational keyword in Victorian aesthetics a familiar term reconceived through the lens of new media Character appears differently when considered with caricature in the new comics and cartoons appearing in the mass press in the 1830s likewise the book approaches realism through pictorial journalism illustration via illustrated Bibles sensation through carte de visite portrait photographs the picturesque by way of stereoscopic views and decadence through advertising posters *Picture World* studies the aesthetic effects of the nineteenth century's media revolution it uses the relics of a previous era's cultural life to interrogate the Victorian world's most deeply held values arriving at insights still relevant in our own media age
