Witting, 2018-01-11 What happens when a corporate subsidiary or network company is unable to pay personal injury victims in full This book sets out to tackle the insolvent entity problem especially as it arises in cases of mass wrongdoing such as those involving asbestos exposure and defective pharmaceuticals After discussing the nature of corporate groups and networks from the perspectives of business history organisation studies and social theory the book assesses a range of rules and proposed rules for extending liability for personal injuries beyond insolvent entities New proposals are put forward for an exception to the rule of limited liability and for the development of a flexible new tort based on conspiracy that encompasses not only control based relationships but also horizontal coordination between companies The book concludes with a general discussion of lessons learned from debates about extended liability and provides guidelines for the development of new liability rules

Protestant Nonconformity and Christian Missions Martin Wellings, 2014-02-01 The aim of the book is to explore some of the contributions made by Protestant Nonconformity to Christian missions The occasion of the conference which gave rise to the volume was the centenary of the Edinburgh Missionary Conference of 1910 but the topics treated here deliberately range more widely covering missions in Britain and the wider world from the eighteenth to the twentieth century

COMMENDATIONS Martin Wellings is to be warmly thanked for gathering such an informative and stimulating collection of papers They are scholarly and accessible and deserve to be widely read Alan P F Sell University of Wales Trinity Saint David UK T&T Clark Companion to Nonconformity Robert Pope, 2013-11-21 Protestant Nonconformity the umbrella term for

Congregationalists Presbyterians Baptists Methodists and Unitarians belongs specifically to the religious history of England and Wales Initially the result of both unwillingness to submit to the State s interference in Christian life and a dissatisfaction with the progress of reform in the English Church Nonconformity has been primarily motivated by theological concern ecclesial polity devotion and the nurture of godliness among the members of the church Alongside such churchly interests

Nonconformity has also made a profound contribution to debates about the role of the State to family life and education culture in general trade and industry the development of philanthropy and charity and the development of pacifism In this volume for the first time Nonconformity and the breadth of its activity come under the expert scrutiny of a host of recognised scholars The result is a detailed and fascinating account of a movement in church history that while currently in decline has made an indelible mark on social political economic and religious life of the two nations *When the Air Became Important* Janet Greenlees,2019-03-15 Janet Greenlees examines the working environments of the heartlands of the British and American cotton textile industries from the nineteenth to the late twentieth centuries She contends that the air quality within these pioneering workplaces was a key contributor to the health of the wider communities of which they were a part

Beyond the Factory Gates Peter Bartrip,2006-07-01 Beyond the Factory Gates examines the issue of asbestos and health in the USA between the early 1900 s to the mid 1970s Areas covered include the emergence of medical concern about the three fatal diseases related to asbestos asbestosis lung cancer and mesothelioma the actions of the US Navy the main consumer of asbestos based insulation products the response of the federal government before and after enactment of the Occupational Safety and Health Act in 1970 and the roles of organized labour and the asbestos industry The book provides an important insight into occupational health and its regulation in twentieth century America and is original in several ways First there is no satisfactory history of asbestos health and medicine in the USA a major gap in the literature Second no previous publication has examined the asbestos issue beyond the factory gates in a non manufacturing context and explored the complex interactions between organised labour the US Government business corporations and the US navy Finally Beyond the Factory Gates avoids the one sided anti business interpretations that predominate much of the existing literature It accepts that the history of asbestos is in many ways a human tragedy but it rejects simplistic universalised arguments that this has been a tragedy with a cast only villains dupes and victims Scared to Death Christopher Booker,Richard North,2020-08-06 Newly revised and updated in the light of COVID 19 For most of the latter part of the last century and the early part of this Britain has been assailed by a succession of scares from salmonella and eggs to BSE from the Millennium Bug to bird flu from DDT to passive smoking from asbestos to global warming These scares have become one of the most conspicuous and damaging features of our modern world so much so that as we entered the third decade of the new century our senses had become so blunted that we scarcely recognised the real thing for what it was until it arrived COVID 19 for which we were almost completely unprepared The authors analyse the crucial roles of the different factions who perpetrated the scares from the scientists who misread or manipulated the evidence to the media and lobbyists who eagerly promoted scares without regard to the consequences and the politicians and officials who came up with absurdly disproportionate responses leaving us to pay a colossal price In this updated edition Scared to Death not only presents a detailed account of the scares that have dominated our society for the past 50 years through all of which the authors lived but also examines the

background to the COVID 19 pandemic tracing our lack of preparedness to its roots and then assessing by way of contrast why this is the real thing as opposed to the succession of scares that we have experienced

Defending the Indefensible Jock McCulloch, Geoffrey Tweedale, 2008-07-24 In the early twentieth century asbestos had a reputation as a lifesaver In 1960 however it became known that even relatively brief exposure to asbestos can cause mesothelioma a virulent and lethal cancer Yet the bulk of the world's asbestos was mined after 1960 Asbestos usage in many countries continued unabated This is the first global history of how the asbestos industry and its allies in government insurance and medicine defended the product throughout the twentieth century It explains how mining and manufacture could continue despite overwhelming medical evidence as to the risks The argument advanced in this book is that asbestos has proved so enduring because the industry was able to mount a successful defense strategy for the mineral a strategy that still operates in some parts of the world This defence involved the shaping of the public debate by censoring and sometimes corrupting scientific research nurturing scientific uncertainty and using allies in government insurance and medicine The book also discusses the problems of asbestos in the environment compensating victims and the continued use of asbestos in the developing world Its global focus shows how asbestos can be seen as a model for many occupational diseases indeed for a whole range of hazards produced by industrial societies The book is based on a wealth of documentary material gained from legal discovery supplemented by evidence from the authors visits and researches in the US the UK Canada Kazakhstan Zimbabwe Australia Swaziland and South Africa

the processes involved The global perspective emphasized by the authors is not just about globality in the geographical sense An important part of the way forward suggested here involves considering all aspects of humanity the physical mental and spiritual strength stamina and fitness of individuals groups and societies in the context of a Global Fitness Framework All this is presented in a practical and approachable style that enables these authors to introduce a new approach to a key element of management thinking in a way that will encourage and empower individuals to think on a different scale challenge assumptions and exercise effective leadership
