Carbon Footprints as Cultural-Ecological Metaphors Anita Girvan,2017-10-10 Through an examination of carbon footprint metaphors this books demonstrates the ways in which climate change and other ecological issues are culturally and materially constituted through metaphor The carbon footprint metaphor has achieved a ubiquitous presence in Anglo North American public contexts since the turn of the millennium yet this metaphor remains under examined as a crucial mediator of political responses to the urgent crisis of climate change Existing books and articles on the carbon footprint typically treat this metaphor as a quantifying metric with little attention to the shifting mediations and practices of the carbon footprint as a metaphor This gap echoes a wider gap in understanding metaphors as key figures in mediating more than human relations at a time when such relations profoundly matter As a timely intervention this book addresses this gap by using insights from environmental humanities and political ecology to discuss carbon footprint metaphors in popular and public texts This book will be of great interest to researchers and students of environmental humanities political ecology environmental communication and metaphor studies

In Motion Tony Hiss,2017-10-18 In this extraordinarily wide ranging insightful and revelatory book Tony Hiss is the much praised author of *The Experience of Places* delves into a unique and instantly recognizable though previously undescribed experience that can happen to us when we travel a special understanding and ability that can leave us feeling exhilarated He illustrates how throughout human history from our ancestors walking upright for the first time to astronauts walking on the moon we have repeatedly availed ourselves of this seemingly elusive quality which he calls Deep Travel The sensation of

Deep Travel can overtake us Hiss says whenever we tap into a sophisticated wide awake awareness we all possess With a wealth of examples from evocative accounts of his own journeys to celebrated travel writing across the centuries Hiss identifies and rescues this powerful capacity and sets out simple techniques for accessing it no matter where we are And this is only a jumping off point for an original and penetrating explanation of how Deep Travel radically alters our perception of not only where we are but also when we are by placing us in an extended present and how it acts as an open sesame to enlarge and enrich the world around us Going even further he investigates how we can remain absolutely still but travel in time itself as our horizons move backward to include layers of nature and human culture that have gone before or project us forward to consider what our actions will mean to those who will inhabit our spot on earth a few generations from now Whether travel takes you around the corner or around the world once you ve read *In Motion* no journey will ever feel the same
