Preserving the Spell Armando Maggi,2024-05-31 Fairy tales are supposed to be magical surprising and exhilarating an enchanting counterpoint to everyday life that nonetheless helps us understand and deal with the anxieties of that life Today however fairy tales are far from marvelous in the hands of Hollywood they have been stripped of their power offering little but formulaic narratives and tame surprises If we want to rediscover the power of fairy tales as Armando Maggi thinks we should we need to discover a new mythic lens a new way of approaching and understanding and thus re creating the transformative potential of these stories In Preserving the Spell Maggi argues that the first step is to understand the history of the various traditions of oral and written narrative that together created the fairy tales we know today He begins his exploration with the ur text of European fairy tales Giambattista Basile s *The Tale of Tales* then traces its path through later Italian French English and German traditions with particular emphasis on the Grimm Brothers adaptations of the tales which are included in the first ever English translation in an appendix Carrying his story into the twentieth

century Maggi mounts a powerful argument for freeing fairy tales from their bland contemporary forms and reinvigorating our belief that we still can find new powerfully transformative ways of telling these stories

Kelly, 2022 Writing circa 731 CE Bede professes in the introduction to his *Historia Ecclesiastica Gentis Anglorum* that he will write his account of the past of the English following only *vera lex historiae* Whether explicitly or most often implicitly historians narrate the past according to a

conception of what constitutes historical truth that emerges in the use of narrative strategies of certain formulae or textual forms in establishing one's own ideological authority or that of one's informants in faithfulness to a cultural narrative or poetic tradition. If we extend the scope of what we understand by history especially in a pre-modern setting to include not just the writings of historians legitimated by their belonging to the Latinate matrix of Christianized classical history writing but also collective narratives, practices, rituals, oral poetry, liturgy, artistic representations and acts of identity, all re-enacting the past as or as representation of the present, we find a plethora of modes of constructions of historical truth, narrative authority and reliability. Vera Lex Historiae will be constituted by contributions that reveal the variety of eventual strategies by which historical truth was constructed in late antiquity and the earlier Middle Ages and the range of procedures by which such narratives were established first as being historical and then as true histories. This is not only a matter of narrative strategies but also habitus, ways of living and acting in the world that feed on and back into the commemoration and re-enactment of the past by communities and by individuals. In doing this we hope to recover something of the plurality of modes of preserving and reenacting the past available in late antiquity and the earlier middle ages which we pass by because of preconceived notions of what constitutes history writing.

Medieval Tales of Thorn Frank Keith, In a time long gone by there lived a folk who inhabited a land far far away. Together they lived sometimes in peaceful fellowship but in other times in war and broil and these conflicts could be born out of need to defend or mere pettiness like a lord's longing for more land or power. And there were darker forces too lurking in the big forests and in the mountains to the north and they could spread fear and dread. Enter this world and indulge in everyday life of this time and place and adventures too both small and large and discover the fantasies told herein sprinkled with some lore and even some truth.

Fables of the Law Daniela Carpi, Marett Leiboff, 2016-10-24. The latest development concerning the metaphorical use of the fairy tale is the legal perspective. The law had and has recourse to fairy tales in order to speak of the *nomos* and its subversion of the politically correct and of the various means that have been used to enforce the law. Fairy tales are a fundamental tool to examine legal procedures and structures in their many failings and errors. Therefore we have privileged the term fables of the law just to stress the ethical perspective: they are moral parables that often speak of justice miscarried and justice sought. Law and jurists are creators of fables on the view that law is born out of the facts: *ex facto ius oritur* so

that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found This is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
