## **Magnetic Mountain:**

**Magnetic Mountain** Stephen Kotkin, 1997-02-27 This study is the first of its kind a street level inside account of what Stalinism meant to the masses of ordinary people who lived it Stephen Kotkin was the first American in 45 years to be allowed into Magnitogorsk a city built in response to Stalin's decision to transform the predominantly agricultural nation into a country of metal With unique access to previously untapped archives and interviews Kotkin forges a vivid and compelling account of the impact of industrialization on a single urban community Kotkin argues that Stalinism offered itself as an opportunity for enlightenment The utopia it proffered socialism would be a new civilization based on the repudiation of capitalism The extent to which the citizenry participated in this scheme and the relationship of the state's ambitions to the dreams of ordinary people form the substance of this fascinating story Kotkin tells it deftly with a remarkable understanding of the social and political system as well as a keen instinct for the details of everyday life Kotkin depicts a whole range of life from the blast furnace workers who labored in the enormous iron and steel plant to the families who struggled with the shortage of housing and services Thematically organized and closely focused *Magnetic Mountain* signals the beginning of a new stage in the writing of Soviet social history *The Magnetic Solar System* Ulrich von Kusserow, Eckart

Marsch, 2025-04-28 This book describes a great variety of significant space plasma processes and the eminent influence that in particular magnetic processes have on the formation structure and development of objects in our solar system Supported by vivid graphics real shots and links to video sequences all these processes are while being didactically prepared explained thoroughly with few mathematical derivations The book is written mainly for students but also for amateurs or scientists from various fields interested in space science It appeals to those who may want to gain a comprehensive overview of the far reaching impacts of magnetic fields on many things in our solar system or beyond in extrasolar planetary systems and stars in the distant universe The topics discussed here with emphasis on magnetism comprise the structure and dynamics of the solar system and its objects the solar interior and atmosphere the time variable solar activity the solar wind processes in the heliosphere and planetary magnetospheres as well as space weather Scientific instruments experiments and measurement methods are presented with the help of which solar and plasma physicists astrophysicists and planetary scientists can today gain their deep and fascinating insights Theoretical and numerical results are interpreted and recent observations are explained which were made by modern telescopes on Earth and obtained by satellites in space through either optical remote sensing and or in situ plasma measurements *The Magnetic Declination* Mioara Manda, 2022-09-08 This book aims then

to describe in a comprehensible way efforts made over centuries of measuring and understanding the magnetic declination The book also highlights some important characteristics of the Earth's magnetic field thanks to the declination measurements Some applications and societal implications are also underlined Anyone living in the 21st century knows the best way to navigate is by using a smartphone App Decades and centuries ago in order to find the same way a magnificent instrument

was used the compass Despite many being aware of the compass not everyone appreciates that throughout the ages of exploration sailors and explorers linked their lives and great discoveries to the magnetic needle Furthermore is there an awareness of the Earth's physical mechanism behind the changes in time and space of the direction indicated by the compass The magnetic declination is at the center of this book and it helps the reader to understand how to navigate in time and space The book provides the history of the compass and magnetic declination leading the reader to the understanding of our magnetic planet This book is designed for those who are fascinated by the long history of geomagnetism This book relies on reader's knowledge of elementary scientific concepts and introduces the geomagnetism concepts as they evaluated in time The focus is on some basic concepts and physical processes in order to understand the evolution of a specific element of the geomagnetic field the declination The primary audience may have just started an interest in the geomagnetism and history of science as students and researchers Some readers may have an interest that only touches the geomagnetism as navigators geophysicists historians

*The Complete Poems of C. Day Lewis* Cecil Day Lewis, 1992 C Day Lewis 1904 1972 was one of the leading young poets of the 1930s who along with W H Auden Louis MacNeice and Stephen Spender broke away from the staid poetic establishment to dominate British poetry in the middle third of the century Here for the first time are all the poems Day Lewis wrote including occasional verse which has never appeared in book form and a number of poems previously published only in limited editions The Complete Poems has been edited with an introduction and textual notes by Jill Balcon the poet's widow

**What Was Soviet Ideology?** Petre Petrov,2023-11-02 Because the Soviet Union loudly proclaimed to be an ideological state its scholars have rarely scrutinized ideology as a concept Instead they have treated it as a self evident fact and proceeded to deliberate the importance of the Marxist Leninist creed in social life or political decision making In the context of the Cold War such theoretical neglect was exacerbated by political investments that often outweighed and deformed intellectual priorities This has left us today with a notion that is both worn out and opaque over used but under thought In What Was Soviet Ideology Petre Petrov stakes a new theoretical ground beyond prevalent misconceptions ready made definitions and popular stereotypes Drawing on continental philosophy and critical theory this book presents ideology as a dynamic form with its own inner dialectic in which the Soviet ideological regime figures as an original moment a sui generis phenomenon Petrov argues that Soviet ideology should be seen not as a member of an existing species but as a qualitative transformation of the species ideology and itself *The Collective and the Individual in Russia* Oleg Kharkhordin,2023-04-28 Oleg Kharkhordin has constructed a compelling subtle and complex genealogy of the Soviet individual that is as much about Michel Foucault as it is about Russia Examining the period from the Russian Revolution to the fall of Gorbachev Kharkhordin demonstrates that Party rituals which forced each Communist to reflect intensely and repeatedly on his or her self an entirely novel experience for many of them had their antecedents in the Orthodox Christian practices of doing penance in the public gaze Individualization in Soviet Russia occurred through the intensification of these public penitential practices rather than the private confessional practices that are characteristic of Western Christianity He also finds that objectification of the individual in Russia relied on practices of mutual surveillance among peers rather than on the hierarchical surveillance of subordinates by superiors that characterized the West The implications of this book expand well beyond its brilliant analysis of the connection between Bolshevism and Eastern Orthodoxy to shed light on many questions about the nature of Russian society and culture Oleg Kharkhordin has constructed a compelling subtle and complex genealogy of the Soviet individual that is as much about Michel Foucault as it is about Russia Examining the period from the Russian Revolution to the fall of Gorbachev Kharkhordin demon **180 Masterpieces of World Literature (Vol.1)** Walt Whitman,George Eliot,Herman Hesse,Kahlil Gibran,Anton Chekhov,Herman Melville,Oscar Wilde,Fyodor Dostoevsky,William Shakespeare,Mark
