

The scanning electron microscope (SEM) enables us to see the often invisible world in which we live. In this unique book, you will see dimensional images and hand-colored photographs of everyday items such as string and table salt, plants, insects and other animals, and various parts of the body—all magnified dozens to thousands of times.

You will be astounded by the beauty and beautiful details of these electron microscope photos, called micrographs. Lift the flaps and you will discover intriguing structures. At the end of the book, you will have a chance to guess what objects or animals the micrographs are the flaps show.

MAGNIFICATION reveals a surprising, hidden world for all ages to explore.

Micrograph of a plant.

Micrograph of a seed.

Micrograph of insect eggs.
