Main Lines Across The Border:

An Historical Geography of Railways in Great Britain and Ireland David Turnock, 2016-12-05 Although a great deal has been published on the economic social and engineering history of nineteenth century railways the work of historical geographers has been much less conspicuous This overview by David Turnock goes a long way towards restoring the balance It details every important aspect of the railway s influence on spatial distribution of economic and social change providing a full account of the nineteenth century geography of the British Isles seen in the context of the railway The book reviews and explains the shape of the developing railway network beginning with the pre steam railways and connections between existing road and water communications and the new rail lines The author also discusses the impact of the railways on the patterns of industrial urban and rural change throughout the century Throughout the historical geography of Ireland is treated in equal detail to that of Great Britain

Crossing the Border Great Britain: Parliament: House of Commons: Welsh Affairs Committee, 2013-03-06 Problems with key M4 transport route continue to risk damage to Welsh economy The route has suffered from under investment and congestion for too long The UK and Welsh Governments must work together to find attainable funded solutions to these problems The Committee also says the high toll on the Severn Crossing is still hampering the development of businesses in Wales and deterring inward investment to Wales and the UK Government should bring forward proposals for reducing it The Committee also welcomes the new investment in cross border rail links into Wales but the exclusion of South Wales from the HS2 proposals means businesses and people may relocate eastwards across the border The development of a high speed rail link from Wales to England would be an important boost to the Welsh economy and help to achieve the aim of successive Governments of rebalancing the UK economy There are good examples of joint working between the two governments to secure improvements to strategic cross border routes and especially welcome is the almost 2 billion of rail investment on the electrification of the Great Western Main Line and a proposed new rail link to Heathrow Airport But the Committee says it is unclear why the Welsh Government should be entitled to a Barnett consequential payment in respect of the Crossrail project but not HS2 It also notes that rail connectivity between North and Mid Wales and England has been overlooked for too long and calls for more frequent rail connections from Mid Wales to England

North Pacific Ports , 1919 Fortress Europe J.E. Kaufmann, H.W. Kaufmann, 2022-06-02 A few of the fortifications and fortified lines of the world wars are well known and have often been written about illustrated and studied But they tend to distract attention from the wide range of fixed defenses constructed across Europe on an enormous scale after the Franco Prussian War of 1870 71 during a period of insecurity and aggression That is why this new highly illustrated study which covers the entire continent is so valuable The authors examine the major fortified positions and describe their strategic purpose their design and construction and the role they played in military planning and operations The outstanding contribution of the major military architects of the time is a

key theme The work of S r de Rivi res Brialmont and others had a major influence on the course of the First World War and on the fortifications built before and during the Second World War Their approach is visible in the designs for the Maginot Line the East and West walls of Germany the Vallo Alpino in Italy the Soviet Stalin and Molotov lines the Mannerheim and Salpa lines of Finland the Greek Metaxas Line the Bene Line of Czechoslovakia as well as the defenses built by the Dutch and Scandinavians The breadth of the coverage the degree of detail and the numerous illustrations make the book essential reading and reference for anyone who has a special interest in the world wars and the history of fortifications
