Maintaining Outer Space For Peaceful Uses:

Maintaining Outer Space for Peaceful Uses Nandasiri Jasentuliyana, United Nations University, 1984 **Peaceful and Non-Peaceful Uses of Space** Unidir United Nations Institute For Disarmament Research, 2021-01-26 This book first published in 1991 is the cumulative result of a long period of research by qualified experts in an attempt to analyse the legal and scientific problems of arriving at definitions in the task of preventing an arms race in outer space Problems of definition confront the negotiator at the very outset of any discussion on preventing a space arms race this book sets out to remove these problems by examining the possible definitions **Report of the Committee on the Peaceful Uses of Outer Space** United Nations. General Assembly. Committee on the Peaceful Uses of Outer Space, 2000 Space Security and Legal Aspects of Active Debris Removal Annette Froehlich, 2018-11-27 The book analyzes the various legal and political concepts to resolve the problem of the existing space debris in outer space and which measures have been taken to avoid space debris or to reduce potential space debris in the course of future space missions From a scientific and technical point of view various studies are ongoing to analyze the feasibility of active debris removal Nevertheless it has to be highlighted that outer space is an international area where various actors with different legal and political concepts are operating a situation that leads to different approaches concerning such activities The Air Force Law Review , 2002 **Space Science and the Arab World** Jörg Matthias Determann, 2018-01-29 When Sultan bin Salman left Earth on the shuttle Discovery in 1985 he became the first Arab first Muslim and first member of a royal family in space Twenty five years later the discovery of a planet 500 light years away by the Qatar Exoplanet Survey subsequently named Qatar 1b was evidence of the cutting edge space science projects taking place across the Middle East This book identifies the individuals institutions and national ideologies that enabled Arab astronomers and researchers to gain support for space exploration when Middle East governments lacked interest Jörg Matthias Determann shows that the conquest of space became associated with national prestige security economic growth and the idea of an Arab renaissance more generally Equally important to this success were international collaborations to benefit from American and Soviet expertise and technology Arab scientists and officials had to commit to global governance of space and the common interests of humanity Challenging the view that the golden age of Arabic science and cosmopolitanism was situated in the medieval period Determann tells the story of the new discoveries and scientific collaborations taking place from the 19th century to the present day An innovative contribution to Middle East studies and history of science the book also appeals to increased business media and political interest in the Arab space industry

Yearbook on Space Policy 2006/2007 Kai-Uwe Schrogl, Charlotte Mathieu, Nicolas Peter, 2008-10-20 The Yearbook on Space Policy aims to be the reference publication analyzing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European Yearbook of the United Nations, Volume 39 (1985) United Nations, 2023-08-28 **Space Supporting Latin America** Annette

Froehlich, Diego Alonso Amante Soria, Ewerton De Marchi, 2020-04-16 This book examines the background and context of Latin America's political and socioeconomic landscape with a focus on space activities. Firstly, it discusses Latin America's contribution to this sector from an international relations perspective and explores the debates around the establishment of a Latin American Space Agency. It then highlights space-related capacity building, Latin America's participation in UNCOPUOS and international space activities agreements and initiatives in Latin America. The second part is devoted to the national space infrastructures and space activities of Latin American states. It analyzes various spacefaring countries in the context of their intra-regional space relations and initiatives as well as their bi-lateral cooperation programs. This timely book is of interest to scholars and professionals working in the space field, especially those in Latin America and other emerging countries. International Law, Security, and Military Power Howard Hensel, Carlos Alberto Leite da Silva, 2025-09-01 This book contributes to our understanding and appreciation of the contemporary relevance of international humanitarian law and international human rights law by analyzing and assessing the foundational norms, principles and provisions contained within these bodies. It also explores the ways in which they inform and condition military doctrine and the planning and the execution of military operations in the land, air, cyber and space domains as perceived through the lens of two of the most important military establishments in the Western Hemisphere: the United States and Brazilian militaries. The expert contributors promote a better awareness and comparative understanding of the rapidly changing diverse traditional and non-traditional challenges and demands of the 21st century. This volume will be useful to both scholars whose research focuses on international law and military professionals. **The United Nations and Space Security** Annette Froehlich, Vincent

Seffinga, 2019-08-10 This book provides a detailed analysis on the history and development of the Committee on the Peaceful Uses of Outer Space (UNCOPUOS) and the Conference on Disarmament (CD) and the coordination and cooperation between these two fora. Furthermore, it discusses the future challenges that these fora will have to deal with and conclude in which way the current system can change to cope with the evolution of space matters. This is necessary for the proper discussion of space matters because these matters cannot simply be divided between military and non-military but are interrelated.

Routledge Handbook of Space Law Ram Jakhu, Paul Stephen Dempsey, 2016-11-10 This handbook is a reference work providing a comprehensive, objective and comparative overview of Space Law. The global space economy reached 330 billion in 2015 with a growth rate of 9 per cent vis-à-vis the previous year. Consequently, Space Law is changing and expanding expeditiously, especially at the national level. More laws and regulations are being adopted by spacefaring nations while more countries are adapting their Space Laws and regulations related to activities in outer space. More regulatory bodies are being

created while more regulatory diversity from public law to private law is being instituted as increasing and innovative activities are undertaken by private entities which employ new technologies and business initiatives At the international level Space Law both hard law and soft law is expanding in certain areas especially in satellite broadcasting and telecommunications The Routledge Handbook of Space Law summarises the existing state of knowledge on a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues Unlike other books on the subject it addresses major international and national legal aspects of particular space activities and issues rather than providing commentary on or explanations about a particular Space Law treaty or national regulation Drawing together contributions from leading academic scholars and practicing lawyers from around the world the volume is divided into five key parts Part I General Principles of International Space Law Part II International Law of Space Applications Part III National Regulation of Space Activities Part IV National Regulation of Navigational Satellite Systems Part V Commercial Aspects of Space Law This handbook is both practical and theoretical in scope and may serve as a reference tool to academics professionals and policy makers with an interest in Space Law
