Marx And Whitehead Process Dialectics And The Critique Of Capitalism:

Marx and Whitehead Anne Fairchild Pomeroy,2004-01-29 A reading of Marx s critique of capitalism through the lens of process philosophy **Marx and Whitehead** Anne Fairchild Pomeroy,2012-02-01 Marx and Whitehead boldly asks us to reconsider capitalism not merely as an economic system but as a fundamentally self destructive mode that by its very nature and operation undermines the cohesive fabric of human existence Author Anne Fairchild Pomeroy asserts that it is impossible to appreciate fully the impact of Marx s critique of capitalism without understanding the philosophical system that underlies it Alfred North Whitehead s work is used to forge a systematic link between process philosophy and dialectical materialism via the category of production Whitehead s process thought brings Marx s philosophical vision into sharper focus This union provides the grounds for Pomeroy s claim that the heart of Marx s critique of capitalism is fundamentally ontological and that therefore the necessary condition for genuine human flourishing lies in overcoming the capitalist form of social relations

Marx in the Age of Digital Capitalism ,2015-09-29 More than 130 years after Karl Marx s death and 150 years after the publication of his opus magnum Capital Critique of Political Economy capitalism keeps being haunted by period crises The most recent capitalist crisis has brought back attention to Marx s works This volume presents 16 contributions that show how Marx s analyses of capitalism the commodity class labour work exploitation surplus value dialectics crises ideology class struggles and communism help us to understand the Internet and social media in 21st century digital capitalism Marx is back This book is a key resource on the foundations of Marxist Internet and Digital Media Studies **Molecular Capture** Adam Nocek,2021-01-05 How computer animation technologies became vital visualization tools in the life sciences Who would have thought that computer animation technologies developed in the second half of the twentieth century would become essential visualization tools in today s biosciences This book is the first to examine this phenomenon Molecular Capture reveals how popular media consumption and biological knowledge production have converged in molecular animations computer simulations of molecular and cellular processes that immerse viewers in the temporal unfolding of molecular worlds to produce new regimes of seeing and knowing Situating the development of this technology within an evolving field of historical epistemological and political negotiations Adam Nocek argues that molecular animations not only represent a key transformation in the visual knowledge practices of life scientists but also bring into sharp focus fundamental mutations in power within neoliberal capitalism In particular he reveals how the convergence of the visual economies of science and entertainment in molecular animations extends neoliberal modes of governance to the perceptual practices of scientific subjects Drawing on Alfred North Whitehead s speculative metaphysics and Michel Foucault s genealogy of governmentality Nocek builds a media philosophy well equipped to examine the unique coordination of media cultures in this undertheorized form of scientific media More specifically he demonstrates how governmentality operates across visual practices in the biosciences and the popular mediasphere to shape a molecular animation apparatus that unites scientific knowledge and

entertainment culture Ultimately Molecular Capture proposes that molecular animation is an achievement of governmental design It weaves together speculative media philosophy science and technology studies and design theory to investigate how scientific knowledge practices are designed through media apparatuses

Recent Advances in the Creation of a Process-Based Worldview Łukasz Lamża,2017-01-06 Process thought is an important component of contemporary philosophy Alfred North Whitehead s organic philosophy has a special place in the landscape of process thinking being detailed precise and well thought and at the same time extremely visionary and far reaching The global community of process thinkers includes physicists biologists doctors political scientists educators activists philosophers theologians and other people devoted to rethinking their disciplines in the light of process philosophy This volume presents the cutting edge in the creation of a process worldview Leading scholars from all over the world gathered to discuss how process thinking can inspire us to rethink our lives Precise philosophical language and a unifying vision are applied to core issues such as politics society education and religion The book represents a bold move from academic philosophy into the realm of actual human lives

A World to Win Sven-Eric Liedman,2018-05-01 This essential Karl Marx biography expertly weaves the complex personality of the legendary thinker through the turbulent passage of global history The first biography to give equal weight to both the work and life of Karl Marx *A World to Win* follows Marx through childhood and student days a difficult and sometimes tragic family life his far sighted journalism and his enduring friendship and intellectual partnership with Friedrich Engels Building on the work of previous biographers Liedman employs a commanding knowledge of the 19th century to create a definitive portrait of Marx and his vast contribution to the way the world understands itself He shines a light on Marx s influences explains his political and intellectual interventions and builds on the legacy of his thought Liedman shows how Marx s masterpiece *Capital* illuminates the essential logic of a system that drives dizzying wealth grinding poverty and awesome technological innovation to this day Compulsively readable and meticulously researched *A World to Win* demonstrates that Marx s work remains the bedrock for any true understanding of our political and economic condition even two centuries after his death

The Economic Philosophy of the Internet of Things James Juniper,2018-06-27 To properly understand the nature of the digital economy we need to investigate the phenomenon of a ubiquitous computing system UCS As defined by Robin Milner this notion implies the following characteristics i it will continually make decisions hitherto made by us ii it will be vast maybe 100 times today s systems iii it must continually adapt on line to new requirements and iv individual UCSs will interact with one another This book argues that neoclassical approaches to modelling economic behaviour based on optimal control by representative agents are ill suited to a world typified by concurrency decentralized control and interaction To this end it argues for the development of new process based approaches to analysis modelling and simulation The book provides the context both philosophical and mathematical for the construction and application of new rigorous and meaningful analytical tools In terms of social theory it adopts a Post Cognitivist approach the elements of which

include the nature philosophy of Schelling Marx's critique of political economy Peircean Pragmatism Whitehead's process philosophy and Merleau Ponty's phenomenology of the flesh along with cognitive scientific notions of embodied cognition and neural Darwinism as well as more questionable notions of artificial intelligence that are encompassed by the rubric of perception and action without intelligence

The Ecological Rift John Bellamy Foster, Brett Clark, Richard York, 2011-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In *The Ecological Rift: Capitalism's War on the Earth* environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development

The Body Productive Steffan Blayney, Joey Hornsby, Savannah Whaley, 2022-12-29 *The Body Productive* represents a new and radical approach to the relationships between capitalism work and the body Self evident natural biological this is how we think of the body on an everyday basis However this supposedly most direct aspect of our being may in fact be a primary site of socio economic mediation and ideological reproduction How are bodies produced under capitalism How in turn does capitalism make bodies productive How is the body and knowledge of the body shaped by demands of production consumption and exchange and how can these logics be resisted challenged and overcome These are the questions at the heart of *The Body Productive* a collection of original radical new approaches to the relationships between capitalism work and the body from an international group of scholars and activists Taking inspiration from the neglected theoretical work of Fran ois Gu ry and Didier Deleule and bridging Marxist and Foucauldian traditions this book rethinks the relationships between the biological and the social the body and the mind power and knowledge discipline and control

Ethical Marxism Bill Martin, 2013-12-01 This book aims to reinvigorate the Marxist project and the role it might play in illuminating the way beyond capitalism Though political economy and scientific investigation are needed for pure Marxism Martin's argument is

that the extent to which these elements are needed cannot be determined within the conversations of political economy and other investigations into causal mechanisms. What has not been done and what this book does is to argue for the possibility of a rethought Marxism that takes ethics as its core, displacing political economy and scientific investigation. The Critical Turn in Tourism Studies Irena Ateljevic, Nigel Morgan, Annette Pritchard, 2013-06-17. In today's increasingly complex tourism environment, decision making requires a rounded, well-informed view of the whole. Critical distance should be encouraged; consultation and intellectual rigour should be the norm amongst managers; and there needs to be a radical shift in our approach to educating future tourism and hospitality managers and researchers. This second edition intends to move the debate forward by exploring how critical tourism inquiry can make a difference in the world, linking tourism education driven by the values of empowerment, partnership, and ethics to policy and practice. This volume is designed to enable its reader to think through vital concepts and theories relating to tourism and hospitality management, stimulate critical thinking, and use multidisciplinary perspectives. The book is organized around three key ways of producing social change: in and through tourism, critical thinking, critical education, and critical action. Part one focuses on the importance of critical thinking in tourism research and deals with two key topics of our academic endeavours: i) tourism epistemology and theoretical and conceptual developments; ii) research entanglements, knowledge production, and reflexivity. Part two considers the university as a site for activism by mapping out the moral, academic, and practical role of educators in developing ethical and responsible graduates and explores the student experience. The final part attempts to provide new understandings of the ways in which social justice and social transformation can be achieved in and through tourism. This timely and thought-provoking book, which collectively questions tourism's current and future role in societal development, is essential reading for students, researchers, and academics interested in Tourism Hospitality. *Theorizing Modern Society as a Dynamic Process* Harry F. Dahms, Lawrence Hazelrigg, 2012-10-29. Emphasis is placed on Continental European social theory and on the importance of political analyses to theorizing modern societies. This title focuses on dynamic processes that gave way to illuminate structural features of modern social life. **Dictionary of Modern American Philosophers** John R. Shook, 2005-01-01. The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain

writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

Thinking with Whitehead and the American Pragmatists Brian G. Henning, William T. Myers, Joseph D. John, 2015-04-16 Despite there being deep lines of convergence between the philosophies of Alfred North Whitehead, C. S. Peirce, William James, John Dewey and other classical American philosophers it remains an open question whether Whitehead is a pragmatist and conversation between pragmatists and Whitehead scholars have been limited. Indeed it is difficult to find an anthology of classical American philosophy that includes Whitehead's writings. These camps began separately and so they remain. This volume questions the wisdom of that separation exploring their connections both historical and in application. The essays in this volume embody original and creative work by leading scholars that not only furthers the understanding of American philosophy but seeks to advance it by working at the intersection of experience and reality to incite novel and creative thought. This exploration is long overdue. Specific questions that are addressed are: Is Whitehead a pragmatist? What contrasts and affinities exist between American pragmatism and Whitehead's thought? What new questions, strategies and critiques emerge by juxtaposing their distinct perspectives?

Process and Pluralism Zhihe Wang, 2013-05-02 This book offers a uniquely process-relational oriented Chinese approach to inter-religious dialogue called Chinese Harmonism. The key features of Chinese harmonism are peaceful co-existence, mutual transformation and openness to change. As developed with help from Whiteheadian process thought, Chinese harmonism provides a middle way between particularism and universalism showing how diversity can exist within unity. Chinese harmonism is open to similarities among religions but it also emphasizes that differences among religions can be complementary rather than contradictory. Thus Chinese harmonism implies an attitude of respect for others and a willingness to learn from others without reducing the other to one's own identity that is to sameness. By emphasizing the possibility of complementarity, a process-oriented Chinese harmonism avoids a dichotomy between universalism and particularism represented respectively by John Hick and S. Mark Heim and will make room for a genuine openness and do justice to the culturally and religiously other.

Process Philosophy and Political Liberalism Daniel A. Dombrowski, 2019-05-03 Daniel A. Dombrowski brings together the thought of the 20th century philosophy's greatest political liberal John Rawls with the thought of the great process philosophers Alfred North Whitehead and Charles Hartshorne. He shows that political liberalism is intimately linked with process philosophy, renaming it process liberalism. He justifies this process liberalism in contrast to four potentially troublesome sources or influences: metaphysics, religion, right wing politics and left wing politics. Dombrowski engages a series of interlocutors and alternative positions including Franklin I. Gamwell, Timothy D. Snyder, Martin Heidegger and Karl Marx. In conclusion he offers a compelling intricate and resourceful argument for nonhuman animal rights based on Rawlsian principles which in turn forms the basis of a future environmental ethics.

Ecologies of the Moving Image Adrian J. Ivakhiv, 2013-10-07 This book presents an ecophilosophy of cinema, an account of the moving image in relation to the lived ecologies, material, social and

perceptual relations within which movies are produced consumed and incorporated into cultural life If cinema takes us on mental and emotional journeys the author argues that those journeys that have reshaped our understanding of ourselves life and the Earth and universe A range of styles are examined from ethnographic and wildlife documentaries westerns and road movies sci fi blockbusters and eco disaster films to the experimental and art films of Tarkovsky Herzog Malick and Brakhage to YouTube s expanding audio visual universe

The Divine Manifold Roland Faber,2014-07-30 *The Divine Manifold* is a postmodern enquiry in intersecting themes of the concept and reality of multiplicity in a chaosmos that does not refuse a dimension of theopoetics but rather defines it in terms of divine polyphilia the love of multiplicity In an intricate play on Dante s Divine Comedy this book engages questions of religion and philosophy through the aporetic dynamics of love and power locating its discussions in the midst of and in between the spheres of a genuine philosophy of multiplicity This philosophy originates from the poststructuralist approach of Gilles Deleuze and the process philosophical inspirations of Alfred N Whitehead As their chaosmos invites questions of ultimate reality religious pluralism and multireligious engagement a theopoetics of love will find paradoxical dissociations and harmonizations with postmodern sensitivities of language power knowledge and embodiment At the intersection of poststructuralism s and process theology s insights in the liberating necessity of multiplicity for a postmodern cosmology the book realizes its central claim If there is a divine dimension of the chaosmos it will not be found in any identification with mundane forces or supernatural powers but on the contrary in the absolute difference of polyphilic love from creativity Yet the concurrent indifference of love and power its mystical undecidability in terms of any conceptualization will lead into existential questions of the insistence on multiplicity in a world of infinite becoming as inescapable background for its importance and creativeness formulating an ecological and ethical impulse for a mystagogy of becoming intermezzo

Capital Redefined S. A. Hamed Hosseini,Barry K. Gills,2023-10-12 *Capital Redefined* presents a unique perspective on the nature of capital departing from the prevailing reductionist accounts Hosseini and Gills offer an expanded perspective on Marxian value theory by addressing its main limitations and building their own integrative value theory They argue that the current understanding of value must be re examined and liberated from its subservient ties to capital while acknowledging the ways in which capital appropriates value This is achieved by differentiating between fetish value created by capital and true value generated through various commons based forms of coexistence The authors propose a defetishization of value by rejecting the commonly accepted idea of its objectivity They introduce their commonist value theory which redefines capital as both the product and process of perverting the fundamental commoning causes of true value into sources of fetish value Capital is theorized through a modular framework where multiple intersecting processes constitute a comprehensive power structure a value regime representing an unprecedented degree of the domination of capital over life Their theory reconciles two apparently incompatible views on the notion of value One view encompasses all inputs involved in capitalist value production and conflates intrinsic and commodity

values The other warns against this conflation as it treats capital as an entity tightly associated only with commodity production and wage labor The authors believe that establishing alternative forms of value creation based on normative principles of living in commons is crucial as an analytical base for criticizing existing power structures and economic systems The book offers a theoretical foundation for transforming our life worlds toward post capitalist futures It appeals to scholars and students in various fields such as political economy capitalism and post capitalist studies economic and political sociology globalization development studies social ecology and ecological philosophy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Marx and We Sun Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical foundations
