Monks And Markets:

Monks and Markets Miranda Threlfall-Holmes, 2005-02-03 The institutions of the middle ages are generally seen as tradition bound Monks and Markets challenges this assumption Durham s outstanding archive has allowed the uncovering of an unprecedented level of detail about the purchasing strategies of one of England s foremost monasteries and it is revealed that the monks were indeed reflective responsive and innovative when required If this is true of a large Benedictine monastery it is likely to be true also for the vast majority of other households and institutions in Medieval England for which comparable evidence does not exist Furthermore this study gives a unique insight into the nature of medieval consumer behaviour which throughout history and particularly from before the early modern period remains a relatively neglected subject Chapters are devoted to the diet of monks the factors influencing their purchasing decisions their use of the market and their exploitation of tenurial relationships and their suppliers

The Stock Market Monk Nikunj, 2015-01-31 The Stock Market Monk is story of fear greed and hope which revolves around Chaitanya Sonia and their three investors who having made a fortune in the stock markets lose almost everything in a global meltdown in the year 2000 thanks to their ignorance and greed Will they be able to recover their money their prestige and their self respect Who shall guide them through the blinding alleys of risk volatility fear and uncertainty and drive them home Can they get help from a young man whom they once insulted whose advice they did not pay any heed to A man who walked away from his lover because of her unethical professional conduct only to come back to lend a helping hand to a bunch of students The students who have joined his classes to make money to learn the art of making a quick buck in the stock market but end up achieving something more worthwhile than simple moneymaking Their learning curve becomes steeper as they learn that there is no shortcut to any place worth going to and that the road to wealth creation not only passes through the by lanes of common sense but also through the ragged terrains of boredom

Corporate Governance in Global Capital Markets Janis Sarra, 2011-11-01 The recent failures of Enron WorldCom and other large publicly traded corporations have catapulted the issue of corporate governance onto the international stage In this timely book Janis Sarra draws together the work of legal scholars and practitioners from across North America to provide a comprehensive analysis of corporate governance issues in global capital markets The contributors to this collection explore the theoretical underpinnings of corporate governance and provide concrete illustration of different models and their outcomes While the perspectives of the authors sometimes differ their common project is to explore different normative conceptions of the corporation in order to contribute to an analysis of global trends in corporate governance The book measures diverse theoretical perspectives against the reality of corporate operations in current capital markets exploring the norms that inform shifts in governance practice and the influence of regulatory regimes on governance change Relationships both within and outside the firm are explored including issues of accountability ethics in decision making and notions of efficiency in generation of corporate wealth Legal

Buddhism, Diplomacy, and Trade Tansen Sen,2015-09-11 Relations between China and India underwent a dramatic transformation from Buddhist dominated to commerce centered exchanges in the seventh to fifteenth centuries The unfolding of this transformation its causes and wider ramifications are examined in this masterful analysis of the changing patterns of the interaction between the two most important cultural spheres in Asia Tansen Sen offers a new perspective on Sino Indian relations during the Tang dynasty 618 907 arguing that the period is notable not only for religious and diplomatic exchanges but also for the process through which China emerged as a center of Buddhist

learning practice and pilgrimage Before the seventh century the Chinese clergy given the spatial gap between the sacred Buddhist world of India and the peripheral China suffered from a borderland complex A close look at the evolving practice of relic veneration in China at Famen Monastery in particular the exposition of Mount Wutai as an abode of the bodhisattva Ma jusri and the propagation of the idea of Maitreya s descent in China however reveals that by the eighth century China had overcome its complex and successfully established a Buddhist realm within its borders The emergence of China as a center of Buddhism had profound implications on religious interactions between the two countries and is cited by Sen as one of the main causes for the weakening of China s spiritual attraction toward India At the same time the growth of indigenous Chinese Buddhist schools and teachings retrenched the need for doctrinal input from India A detailed examination of the failure of Buddhist translations produced during the Song dynasty 960 1279 demonstrates that these developments were responsible for the unraveling of religious bonds between the two countries and the termination of the Buddhist phase of Sino Indian relations Sen proposes that changes in religious interactions were paralleled by changes in commercial exchanges For most of the first millennium trading activities between India and China were closely connected with and sustained through the transmission of Buddhist doctrines The eleventh and twelfth centuries however witnessed dramatic changes in the patterns and structure of mercantile activity between the two countries Secular bulk and luxury goods replaced Buddhist ritual items maritime channels replaced the overland Silk Road as the most profitable conduits of commercial exchange and many of the merchants involved were followers of Islam rather than Buddhism Moreover policies to encourage foreign trade instituted by the Chinese government and the Indian kingdoms contributed to the intensification of commercial activity between the two countries and transformed the China India trading circuit into a key segment of cross continental commerce

The Foundations of Royal Power in Early Medieval Germany David S. Bachrach, 2022 Provocative interrogation of how the Ottonian kingdom grew and flourished focussing on the resources required The Ottonians were the most powerful monarchs in Europe during the tenth and early eleventh century exercising hegemony in West Francia Burgundy and much of Italy in addition to ruling the German realm Despite their enormous political and military success however the foundations of Ottonian royal power remain highly contested and largely misunderstood with previous scholarship tending to have considered it as depending upon the ability of the king to shape and harness the power of the nobles This study challenges the dominant historiographical paradigm rebutting the notion of putative power sharing between the king and the nobility which simply did not exist as a legal class in the Ottonian century Rather it argues that the foundations of royal power under the Ottonians comprised not only their own enormous wealth but also their unique authority and ability through the royal *bannum* the authority inherent in the office of the king to make use of the economic resources and labour of the broad free population of the realm as well as from the Church In so doing the Ottonians drew upon and further developed the administrative institutional and ideological inheritance of their Carolingian predecessors in the process creating the dominant polity in tenth century Europe

Sacred Economies Michael John Walsh, 2010 Buddhist monasteries in medieval China employed a variety of practices to ensure their ascendancy and survival Most successful was the exchange of material goods for salvation as in the donation of land which allowed monks to spread their teachings throughout China By investigating a variety of socioeconomic spaces produced and perpetuated by Chinese monasteries Michael J Walsh reveals the sacred economies that shaped early Buddhism and its relationship with consumption and salvation Centering his study on Tiantong a Buddhist monastery that has thrived for close to seventeen centuries in southeast China Walsh follows three main topics the spaces monks produced within and around which a community could pursue a meaningful existence the social and economic avenues through which monasteries provided diverse sacred resources and secured the primacy of Buddhist teachings within an agrarian culture and the nature of transactive participation within monastic spaces which later became a fundamental component of a broader Chinese religiosity Unpacking these sacred economies and repositioning them within the history of religion in China Walsh encourages a different approach to the study of Chinese religion emphasizing the critical link between religious exchange and the production of material culture

The Cultural Politics of Markets Katharine N. Rankin, 2004-01-01 In a neoliberal era when the ideology of the free market governs community development as much as international trade a conflict between capital and tradition is inevitable Issues such as the value ascribed to honour and social prestige are difficult to negotiate with economic opportunity Using the example of a traditional Nepalese market town Katharine Neilson Rankin explores how economic liberalization has blended with local cultures of value Utilizing the ethnographic method of anthropology and the comparative and normative thrust of geography Rankin undertakes a critique of neoliberal approaches to development She demonstrates how market led development does not expand opportunity but rather deepens existing injustice and inequality which is further exacerbated by planners eager to implement market led approaches relying on naively idealistic notions of social capital to expand poor people's access to the market The Cultural Politics of Markets makes a clear case for a strategic merger between anthropological and planning perspectives in thinking about the issue of market transformation
