theological road trip that explores how geographies are at the heart of understanding of God's incarnation in the world. It is no surprise to Christians that the center of the incarnation is the person of Jesus Christ, God in flesh made manifest. However, it might be a stretch for some Christians to imagine that the promise that God has become flesh is not only in a person but also in a place in the creation. Christians need to expand what incarnation means and what it means to be created in the image of God so that the scope of God's creative and redemptive action and work indeed reaches to the scope of all things from the outer reaches of space to the inner reaches of our hearts. To be the creatures of God that God calls us to be requires a kind of dual citizenship within the details of our daily life, attending to the needs of our neighbors simultaneously knowing we are part of a greater cosmos whose future is still unfolding.

Rocky Mountain Divide John B. Wright, 2010-07-22 The opposing forces of conservation and

development have shaped and will continue to shape the natural environment and scenic beauty of the American West. Perhaps nowhere are their opposite effects more visible than in the neighboring states of Colorado and Utah so alike in their spectacular mountain environments yet so different in their approaches to land conservation. This study explores why Colorado has over twenty five land trusts while Utah has only one. John Wright traces the success of voluntary land conservation in Colorado to the state's history as a region of secular commerce. As environmental consciousness has grown in Colorado people there have embraced the businesslike approach of land trusts as simply a new more responsible way of conducting the real estate business. In Utah by contrast Wright finds that Mormon millennialism and the belief that growth equals success have created a public climate opposed to the formation of land trusts. As Wright puts it environmentalism seems to thrive in the Centennial state within the spiritual vacuum which is filled by Mormonism in Utah. These findings remind conservationists of the power of underlying cultural values that affect their efforts to preserve private lands. **The Living Mountain** Nan Shepherd, 2011-08-18 In this masterpiece of nature writing Nan Shepherd describes her journeys into the Cairngorm mountains of Scotland. There she encounters a world that can be breathtakingly beautiful at times and shockingly harsh at others. Her intense poetic prose explores and records the rocks, rivers, creatures and hidden aspects of this remarkable landscape. Shepherd spent a lifetime in search of the essential nature of the Cairngorms; her quest led her to write this classic meditation on the magnificence of mountains and on our imaginative relationship with the wild world around us. Composed during the Second World War, the manuscript of *The Living Mountain* lay untouched for more than thirty years before it was finally published. *Struggle to the Top of the Mountain* Ernest D. Simela, 2014-02-05 This book is for anyone young or old who has ever had a desire or ambition to achieve the American Dream. It is a story of a man chasing the American Dream told from an African perspective. It is a story which illustrates the power of setting goals and working hard to achieve them. The key is to stay focused. Life is a journey sometimes fraught with many obstacles, highs and lows. In this book the reader will find reason to stay focused on their goal, inspiration to take them over the lows and around the obstacles. Come with me to the Top of The Mountain. Our journey will take us from the sun-drenched arid African reservations, rural areas to which Africans were relegated of Southern Rhodesia, present-day Zimbabwe to the academic halls of Albert Einstein College of Medicine in the Bronx, New York. Enjoy the ride.
