**The Mystic Will** Charles Godfrey Leland, 1907      **The Mystic Will** Charles Godfrey Leland, 2025-01-16

The **Mystic Will** by Charles Godfrey Leland is a thought provoking exploration of the power of the mind and the influence of willpower in shaping one's destiny. Written in the late 19th century, the book blends spiritual philosophy, psychological insight, and mystical traditions to explore how individuals can harness the strength of their own will to effect change in their lives and the world around them. The narrative centers around a character who embarks on a transformative journey after coming into contact with the teachings of The Mystic Will. This mysterious philosophy posits that by focusing and directing one's will with intense concentration and belief, an individual can achieve profound success, overcome obstacles, and even influence others. Through a series of engaging anecdotes and personal reflections, Leland illustrates how the power of the mind can unlock untapped potential and lead to self-discovery. The **Mystic Will** is notable for its integration of Eastern mysticism and Western occult traditions. Leland draws from various schools of thought, including the teachings of Hermeticism, theosophy, and transcendentalism, to build a compelling case for the transformative power of willpower. The text presents a series of exercises designed to help readers focus their energies and strengthen their mental faculties, encouraging them to engage in practices that foster spiritual and personal growth. The book also delves into the nature of thought and consciousness, suggesting that by mastering one's thoughts, a person can gain control over external circumstances. Leland's tone is both philosophical and practical, offering a guide to not only understand the abstract concepts of the will but also to apply them in real-life situations. His work emphasizes the importance of cultivating discipline, focus, and a deep sense of inner purpose in order to navigate life's challenges and create lasting change. The **Mystic Will** is a unique blend of self-help philosophy and mysticism. Readers are drawn to Leland's deep insights into the human psyche and his compelling exploration of the unseen forces that govern our lives. His teachings resonate with those interested in personal empowerment, the development of mental strength, and the pursuit of spiritual enlightenment. The book is especially valuable for individuals seeking to unlock their inner potential and transform their life through the power of thought and will. Owning a copy of **The Mystic Will** is an invitation to explore the untapped power within yourself. Leland's timeless wisdom encourages readers to cultivate a stronger mind, deeper focus, and unwavering determination in their personal and spiritual pursuits. This book is a must-read for anyone interested in personal development, metaphysical teachings, and the art of mastering one's own destiny.

Leland,2013-08 *The Mystic Will* By Charles G Leland A Method of Developing and Strengthening the Faculties of The Mind Through the Awakened Will by a Simple Scientific Process possible to any Person of Ordinary Intelligence It is worth noting that were it for nervous invalids alone or those who from various causes find it difficult to sleep or apply the mind to work this book would be of unquestionable value In fact even while writing this chapter a lady has called to thank me for the substantial benefit which she derived from my advice in this respect And mindful of the fact that Attention and Unwearied Perseverance are most necessary to succeed in such processes as are here described I have taken pains to show or explain how they may be rendered more attractive tolerable and habitual to the fickle or light minded this too being a subject which has been very little considered from a practical point of view But above all things I beg the reader laying aside all prejudice or preconceived opinion and neither believing nor disbelieving what he reads to simply try it that is to test it in his own person to what degree he can influence his will or bring about subsequent states of mind by the very easy processes laid down If I could hope that all opinion of my book would be uttered only by those who had thus put it to the test I should be well assured as to its future And also I beg all readers and especially reviewers to note that I advise that the auto suggestive process by aid of sleep shall be discontinued as soon as the experimenter begins to feel an increase in the power of the will the whole object of the system being to acquire a perfectly free clear Will as soon as possible Great injustice was done as regards the first edition of this work by a very careless though eminent critic who blamed the author for not having done what the latter had carefully recommended in his book      **The Mystic Will, a Method of Developing and Strengthening the Faculties of the Mind, Through the Awakened Will, by a Simple, Scientific Process Possible to Any Person of Ordinary Intelligence** Charles Godfrey Leland,2015-12-06 This work has been selected by scholars as being culturally

The Mystic Will Charles Godfrey Leland,2013-04-27 During the past few years the most serious part of the author s study and reflection has been devoted to the subjects discussed in this book These briefly stated are as follows Firstly that all mental or cerebral faculties can by direct scientific treatment be influenced to what would have once been regarded as miraculous action and which is even yet very little known or considered Secondly in development of this theory and as confirmed by much practical and personal experience that the Will can by very easy processes of training or by aid of Auto Suggestion be strengthened to any extent and states of mind soon induced which can be made by practice habitual Thus as a man can by means of opium produce sleep so can he by a very simple experiment a few times repeated an experiment which I clearly describe and which has been tested and verified beyond all denial cause himself to remain during the following day in a perfectly calm or cheerful state of mind and this condition may by means of repetition and practice be raised or varied to other states or conditions of a far more active or intelligent description

**Awakened Will by a Simple, Scientific Process Possible to Any Person of Ordinary Intelligence** Charles Godfrey Leland, 2020-09-28 It happened recently to me as I write to see one afternoon lying on the side walk in the Via Calzaioli in Florence what I thought was a common iron screw about three inches in length which looked as if it had been dropped by some workman And recalling the superstition that it is lucky to find such an object or a nail I picked it up when to my astonishment I found that it was a silver pencil case but made to exactly resemble a screw Hundreds of people had perhaps seen it thought they knew all about it or what it was and then passed it by little suspecting its real value There is an exact spiritual parallel for this incident or parable of the screw pencil in innumerable ideas at which well nigh everybody in the hurrying stream of life has glanced yet no one has ever examined until someone with a poetic spirit of curiosity or inspired by quaint superstition pauses picks one up looks into it and finds that It has ingenious use and is far more than it appeared to be Thus if I declare that by special attention to a subject earnestly turning it over and thinking deeply into it very remarkable results may be produced as regards result in knowledge every human being will assent to it as the veriest truism ever uttered in the fullest belief that he or she assuredly knows all that Yet it was not until within a very few years that I discovered that this idea which seemed so commonplace had within it mysteries and meanings which were stupendously original or remarkable I found that there was a certain intensity or power of attention far surpassing ordinary observation which we may if we will summon up and force on ourselves just as we can by special effort see or hear far better at times than usually The Romans show by such a phrase as *animum adjicere* and numerous proverbs and synonyms that they had learned to bend their attention energetically They were good listeners therefore keen observers Learning to control or strengthen the Will is closely allied to developing Attention and Interest and for reasons which will soon be apparent I will first consider the latter since they constitute a preparation or basis for the former And as preliminary I will consider the popular or common error to the effect that everyone has allotted to him or to her just so much of the faculty of attention or interest as it has pleased Nature to give the same being true as regards Memory Will the Constructive or Artistic abilities and so on when in very truth and on the warrant of Experience all may be increased ad infinitum Therefore we find ignorant men complacently explaining their indifference to art and literature or culture on the ground that they take no interest in such subjects as if interest were a special heaven sent gift Who has not heard the remark He or she takes such an interest in so many things I wish that I could Or as I heard it very recently expressed It must be delightful to be able to interest one's self in something at any time Which was much the same as the expression of the Pennsylvania German girl Ach Gott I wisht I hat genius und could make a pudden
