essays and central concepts involving pure conscious events and primordial oneness in Nietzsche are addressed in two separate essays Wittgenstein's comments on mysticism are examined in two essays one that places them in the perspective of his overall development and the other that studies them in comparison with recent continental thought The book concludes with two essays that look broadly at the supersensible one from an examination of Kantian aesthetics and the other from quantum mechanical interpretations of reality Taken together these essays attest to the power of mysticism to provoke reasoned thought about ultimate matters

Mysticism and Meaning: Multidisciplinary Perspectives Alex S. Kohav, 2019 The volume investigates the question of meaning of mystical phenomena and conversely queries the concept of meaning itself via insights afforded by mystical experiences The collection brings together researchers from such disparate fields as philosophy psychology history of religion cognitive poetics and semiotics in an effort to ascertain the question of mysticism's meaning through pertinent up to date multidisciplinary The discussion commences with Editor's Introduction that probes persistent questions of complexity as well as perplexity of mysticism and the reasons why problematizing

mysticism leads to even greater enigmas One thread within the volume provides the contextual framework for continuing fascination of mysticism that includes a consideration of several historical traditions as well as personal accounts of mystical experiences Two contributions showcase ancient Egyptian and ancient Israelite involvements with mystical alterations of consciousness and Christianity's origins being steeped in mystical praxis and four essays highlight mysticism's formative presence in Chinese traditions and Tibetan Buddhism as well as medieval Judaism and Kabbalah mysticism A second more overarching strand within the volume is concerned with multidisciplinary investigations of the phenomenon of mysticism including philosophical psychological cognitive and semiotic analyses To this effect the volume explores the question of philosophy's relation to mysticism and vice versa together with a Wittgensteinian nexus between mysticism facticity and truth language mysticism and supernormal meaning engendered by certain mystical states cognitive poetic analysis of mystical poetry and a semiotic scrutiny of some mystical experiences and their ineffability Finally the volume includes an assessment of the so called New Age authors contention of the convergence of scientific and mystical claims about reality The above two tracks are appended with personal contemporary accounts of mystical experiences in the Prologue and a futuristic envisioning as a fictitious chronicle from the time to come of life without things mystical in the Postscript The volume contains fourteen chapters its international contributors are based in Canada Israel United Kingdom and the United States

Mysticism Richard H. Jones, 2025-03-01 Examines how mystical practices and experiences are being applied in secular contexts today Today is an exciting time for mysticism Interest in mysticism today often involves what Aldous Huxley called applied mysticism that is taking mystical practices and experiences out of their traditional contexts where the focus was on the total transformation of the individual and applying them often within a secular framework to help other people with more limited worldly problems such as a person's well being in society or general social change Neuroscientists are taking mystical experiences seriously studying meditators and psychedelic subjects to gain knowledge of how the brain works Cognitive scientists are exploring mystical altered states of consciousness to expand the spectrum of consciousness states in particular whether there is a state of pure consciousness Buddhist meditation is being taken out of its religious contexts and adapted by psychotherapists to help with problems such as depression or addiction The use of psychedelics in psychotherapy is also gaining traction while New Age thinkers are extolling the alleged merger of post Newtonian science with mysticism Mystical ideas are being adapted to problems on the social level for example in socially engaged Buddhism This is the first book to explore all these varieties of applied mysticism together and to examine the current state of the field with a focus on philosophical issues in a readily accessible manner **East Asian Pedagogies** David Lewin, Karsten Kenklies, 2020-07-13

This book opens up philosophical spaces for comparative discussions of education across East and West It develops an intercultural dialogue by exploring the Anglo American traditions of educational transformation and European constructions of Bildung alongside East Asian traditions of transformation and development Comparatively little research has been done in this area and many questions concerning the commensurability of North American European and East Asian pedagogies remain Despite this dearth of theoretical research there is ample evidence of continued interest in self formation through various East Asian practices from martial arts to health and spiritual practices e g Aikido Tai Chi Yoga mindfulness etc suggesting that these traditional practices and pedagogical relations have something important to offer despite their marginal standing in educational discourse This book will appeal to all researchers and students of comparative education studies with an interest in issues of interpretation and translation between different traditions and cultures Ethics of

Compassion Richard Reilly, 2010-09-23 Ethics of Compassion places central themes from Buddhist primarily and Christian moral teachings within the conceptual framework of Western normative ethics What results is a viable alternative ethical theory to those offered by utilitarians Kantian formalists proponents of the natural law tradition and advocates of virtue ethics Ethics of Compassion bridges Eastern and Western cultures philosophical ethics and religious moral discourse and notions of acting rightly and of being virtuous This book will be of interest to anyone who has been introduced to the discipline of ethics It will be useful for undergraduate courses in philosophical and religious ethics **Property Law and Social Morality** Peter M. Gerhart, 2014 Property Law and Social Morality develops a theory of property that highlights the social construction of obligations that individuals owe each other By viewing property law through the lens of obligations

rather than through the lens of rights the author affirms the existence of important property rights when no obligation to another exists and defines the scope of those rights when an obligation to another does exist By describing the scope of the decisions that individuals are permitted to make and the requirements of other regarding decisions the author develops a single theory to explain the dynamics of private and common property including exclusion nuisance shared decision making and decision making over time The development of social recognition norms adds to our understanding of property evolution and the principle of equal freedom underlying social recognition that limit government interference with property rights

Rethinking Ibn 'Arabi Gregory A. Lipton, 2018-04-02 The thirteenth century mystic Ibn Arabi was the foremost Sufi theorist of the premodern era For more than a century Western scholars and esotericists have heralded his universalism arguing that he saw all contemporaneous religions as equally valid In *Rethinking Ibn Arabi* Gregory Lipton calls this image into question and throws into relief how Ibn Arabi's discourse is inseparably intertwined with the absolutist vision of his own religious milieu that is the triumphant claim that Islam fulfilled superseded and therefore abrogated all previous revealed religions Lipton juxtaposes Ibn Arabi's absolutist conception with the later reception of his ideas exploring how they have been read appropriated and universalized within the reigning interpretive field of Perennial Philosophy in the study of Sufism The contours that surface through this comparative analysis trace the discursive practices that inform Ibn Arabi's Western reception back to the eighteenth and nineteenth century study of authentic religion where European ethno racial superiority was wielded against the Semitic Other both Jewish and Muslim Lipton argues that supersessionist models of exclusivism are buried under contemporary Western constructions of religious authenticity in ways that ironically mirror Ibn Arabi's medieval absolutism

Perspectives on Mankind's Search for Meaning Walter Taminang, 2008-06-18 This is a book with a positive message for a negative world It is about the spiritual dimension of human experience In it a precise thinker examines the ways in which we come to know through science religion spirituality philosophy through faith imagination and direct experience This book examines the various pathways to spiritual understanding provides sound and convincing arguments for any believer who also respects science and explains why it is possible for various religions to co exist peacefully This is a hopeful encouraging and above all mature book with timely news for a world convinced of its growing sophistication yet constantly displaying its deep anxiety and essential banality This is a work with a beginning middle and an end by a practical man of deep faith and unshaken conviction

Curing the Philosopher's Disease Richard H. Jones, 2009-09-28 *Curing the Philosopher's Disease* is a philosophical examination of the mysteries surrounding the foundations of science philosophy and religion Much of Western philosophy and science is discussed in order to see our epistemological and metaphysical situation The love hate relation philosophers have with mystery is explored as are the contributions of reductionists and antireductionists postmodern relativists and critical realists naturalists and the religious and theologians and mystics The thrust of the arguments affirms that there are limits to what philosophy science religion and mystical experiences can tell us

about reality By acknowledging that some questions may be unanswerable and understanding the importance of that fact even as the answers remain ambiguous our true situation in the world is revealed Mystery should be reinstated as a basic feature when we reflect upon the nature of what we know and who we are Mystery frames all of our claims to fundamental knowledge and we must accept that it will remain a permanent fixture Thus the importance of mystery needs to be

reaffirmed today during an era when the fullness of reality is often ignored **Pyrrhonism** Adrian Kuzminski,2008-06-19

Pyrrhonism is commonly confused with scepticism in Western philosophy Unlike sceptics who believe there are no true beliefs Pyrrhonists suspend judgment about all beliefs including the belief that there are no true beliefs Pyrrhonism was developed by a line of ancient Greek philosophers from its founder Pyrrho of Elis in the fourth century BCE through Sextus Empiricus in the second century CE Pyrrhonists offer no view theory or knowledge about the world but recommend instead a practice a distinct way of life designed to suspend beliefs and ease suffering Adrian Kuzminski examines Pyrrhonism in terms of its striking similarity to some Eastern non dogmatic soteriological traditions particularly Madhyamaka Buddhism He argues that its origin can plausibly be traced to the contacts between Pyrrho and the sages he encountered in India where he traveled with Alexander the Great Although Pyrrhonism has not been practiced in the West since ancient times its insights have occasionally been independently recovered most recently in the work of Ludwig Wittgenstein Kuzminski shows that Pyrrhonism remains relevant perhaps more than ever as an antidote to today s cultures of belief **Brahman and Dao**

Ithamar Theodor,Zhihua Yao,2013-11-07 The present geopolitical rise of India and China evokes much interest in the comparative study of these two ancient Asian cultures There are various studies comparing Western and Indian philosophies and religions and there are similar works comparing Chinese and Western philosophy and religion However so far there is no systemic comparative study of Chinese and Indian philosophies and religions Therefore there is a need to fill this gap As such Brahman and Dao Comparative Studies of Indian and Chinese Philosophy and Religion is a pioneering volume in that it highlights possible bridges between these two great cultures and complex systems of thought with seventeen chapters on various Indo Chinese comparative topics The book focuses on four themes metaphysics and soteriology ethics body health and spirituality and language and culture **Metaphor and Metaphilosophy** Sarah A. Mattice,2014-10-08 Sarah A Mattice explores contemporary philosophical activity and the way in which one aspect of language metaphor gives shape and boundary to the landscape of the discipline The book examines metaphors of combat play and aesthetic experience and emphasizes how the choices we make in philosophical language are deeply intertwined with what we think philosophy is and how it should be practiced Drawing on a broad range of resources from cognitive linguistics and hermeneutics to aesthetics and Chinese philosophy Mattice s argument provides insight into the evolution and future of philosophy itself

Comparative Philosophy and Religion in Times of Terror Douglas Allen,2006-01-01 Comparative philosophy and religion can help us to understand the violence and terror that often dominate our world These new creative studies ranging in

scope from ancient Biblical Greek Indian and Chinese formulations to recent religious and philosophical positions broaden and deepen our understanding of terror and present new possibilities for greater nonviolence peace and true security
