Myth And Meaning Cracking The Code Of Culture:

Myth and Meaning Claude Levi-Strauss, 1995-03-14 The meeting of myth and science Primitive thinking and the civilized mind Harelips and twins the splitting of a myth When myth becomes history Myth and music EPZ Truth and Method Hans-Georg Gadamer, 2004-12-07 Written in the 1960s TRUTH AND METHOD is Gadamer's magnum opus Looking behind the self-consciousness of science he discusses the tense relationship between truth and methodology In examining the different experiences of truth he aims to present the hermeneutic phenomenon in its fullest extent **Of Divine Warning** Jane Anna Gordon, Lewis R. Gordon, 2015-11-17 This book offers a theory of disaster in modern and contemporary society and its impact on the construction of social and political life The theory is premised upon what the authors call the sign continuum where disaster spreads across society through efforts to evade social responsibility for its causes and consequences Phenomena generated by such efforts include the social manifestation of monstrosity disastrous people and other forms of living things and an emerging antipolitics in an effort to assert rule and order A crucial development is the attack on speech a fundamental feature of political life as manifested by the increased expectations of categories of people whose containment calls for shunning and silence *The Ecology of Power* Michael Heckenberger, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informal company Radicalisation James R. Lewis, Akil N. Awan, 2024-03 A comparative multidisciplinary interrogation of how people across the world become extremists of all kinds and how different scholarly fields study and theorize this process **National Rights, International Obligations** Simon Caney, 2018-02-07 Nationalism is once again rising and spreading Nationlist movements are active throughout the world demanding political recognition of their nations identity Yet the current revival of nationalism has taken place alongside claims that nation states are becoming obsolete in an increasingly globalized world In addition now perhaps more than ever people are conscious of humanity as a whole and are ready to take seriously the international dimensions of morality In this collection of timely essays distinguished moral and political philosophers examine issues raised by the competing claims of nationhood and internationalism from a variety of perspectives and defend a variety of answers Questions discussed include Is humanity really divided into nations or are nations invented by nationalists Does a nation have the right to be self-determining If so must each nation form a separate and sovereign state Do our obligations stop at national boundaries Do we not have obligations to human beings as such Why then should we be less concerned about foreigners than about our compatriots Can we be concerned for social justice within societies yet not across the world as a whole If we embrace ideas of human rights and global obligations how do we establish what those rights and obligations actually are Is it proper plausible or practical to aspire to such universal moral principles in a world characterized by national diversity and cultural difference **Cormac McCarthy** Markus Wierschem, 2024-02-01 This definitive assessment of Cormac McCarthy's novels captures the interactions among the literary and mythic elements the social dynamics of violence and the natural world in

The Orchard Keeper Child of God Outer Dark Blood Meridian and The Road Elegantly written and deeply engaged with previous scholarship as well as interviews with the novelist this study provides a comprehensive introduction to McCarthy's work while offering an insightful new analysis Drawing on Ren Girard's mimetic theory mythography thermodynamics and information science Markus Wierschem identifies a literary apocalypse at the center of McCarthy's work one that unveils another buried deep within the history religion and myths of American and Western culture **Expanding Ecological**

Approaches to Language, Culture, and Identity Jaran Shin, 2023-12-22 This book explores the process of identity reconstruction among mixed heritage children within the context of globalization through the lens of its intersection with Korean society The volume illustrates how these multicultural children mediate hybrid social spaces and examines their personal approaches toward translating resisting and transforming the entanglements engendered in those spaces By tracing the trajectories of their identity reformations over several years the book details the paths these youths have taken to navigate diverse contact zones and cope with institutional regulatory mechanisms It highlights that in the face of prevailing social stigma they actively involve themselves in political action in their day to day lives they redefine what it means to be Korean and but multicultural challenge simplistic membership boundaries and develop unique strategies to resist and subsist These efforts to question the essentialist logic of authenticity demonstrate that these youths situated at the convergence of globalization migration inequality and political power represent a challenge to both national and global orders Arguing that ecological perspectives need to direct greater attention toward the political as well as the posthumanist dimensions of language culture and identity this book is key reading for scholars in applied linguistics intercultural communication and Asian studies *Redefining Reason* Bradley W. Patterson, 2018-11-16 Throughout the twentieth century Western thinkers engaged in a politically charged often highly personal and acrimonious debate over the mental and rational capacity of people from traditional nonliterate societies The issue was a question of whether or not humanity was at bottom psychologically and rationally unified and equal as a species *Redefining Reason* offers the first in depth critical history of that debate and its repercussions in modern Western thought and society Divided into three sections this book first sets the twentieth century primitive mentality debate within its historical context so that it may be better understood It then focuses on some of the highlights of the debate The next section suggests that this debate was in reality a chapter itself in or in an aspect of a much larger story the story of what may be appropriately referred to as the hyperrationalization of human society To conclude this book follows the debate into the twenty first century and offers the clarification and resolutions developed in earlier chapters to contemporary students scholars and educated lay readers *Storytelling for Sustainability in Higher Education* Petra Molthan-Hill, Heather Luna, Tony Wall, Helen Puntha, Denise Baden, 2020-03-25 To be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within

higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students
