readable yet impeccably scholarly investigation of monsters in Classical literature will entertain and stimulate as well as inform. It covers all the major mythical monsters mentioned by Greek and Roman authors: Medusa, Hydra, Polyphemus, the Minotaur, Sphinx, Harpies, Sirens, Cerberus, Chimaera, Centaurs, and many more, along with Classical precursors of vampires, werewolves, and the living dead. Versions of these creatures that appear in later literature and film are also discussed. *Mythical Monsters* is original in considering monsters squarely from a literary standpoint, introducing elements of literary analysis gradually as the work progresses and building up to quite a sophisticated approach. This will increase readers' critical appreciation and plain enjoyment of these stories which continue to fascinate today. To facilitate browsing, each chapter can be read independently. There is a useful bibliography, and the book is enlivened by illustrations from ancient and more recent art.

**Chinese Mythology** Anne Birrell, 1999-04-26 In *Chinese Mythology* Anne Birrell provides English translations of some 300 representative myth narratives selected from over 100 classical texts, many of which have never before been translated into any Western language. Organizing the narratives according to themes and motifs common to world mythology, Birrell addresses issues of source, dating, attribution, textual variants, multiforms, and context. Drawing on exhaustive work in comparative mythology, she surveys the development of Chinese myth studies, summarizes the contribution of Chinese and Japanese scholars to the study of Chinese myth since the 1920s, and examines special aspects of traditional approaches to Chinese myth. The result is an unprecedented guide to the study of Chinese myth for specialists and nonspecialists alike.
