contestation and recreation of bourgeois values the more powerful of these movements then tend towards moderation As Western countries realise the need to engage with the more moderate wings of fundamentalist political groups their rationale and aims become of increasing importance and so academics decision makers and business people interested in South Asia and the Muslim world will find this an invaluable account

Islamic Movements The Emirates Center for Strategic Studies and Research,2003-06-11 Islamic movements have and are still making a strong presence in political and social life in the Arab world over the past century and beyond This is because of their goals and the methods they adopted to achieve them basically took the form of Islamization of their republic or the society which has led to extended conflicts and clashes with some Arab political regimes These confrontations impacted to a great extent political and social stability in these states This book contains a number of articles that offer important viewpoints readings and interpretations of a number of specialists in Islamic movements Specifically it examines the circumstances that led to the appearance of the movements and the relationship between the theory of these movements with its social and political practicality The book also looks at the reasons motives and effect on the Arab state of affairs that led these movements to achieve their goals of extremism or moderation These movements were known to take rejectionist and a hostile stand against democracy and political multiplicity This stance justified their exclusion from the political process

leading to increased tension and instability In order to avoid confrontation it was necessary to allow their political participation as they are an active power This necessarily poses the question about the future of the movement in the shadow of this situation and regional and international variables especially after accusations that some are associated with extremism and terrorism and subsequently declaring war against them whether militarily or legally This includes altering statutes regarding their financing or even their legal existence especially in Western countries A Comparative Study of Islamic Finance in Australia and the UK Imran Lum,2021-09-28 This book provides valuable insights into the practical challenges faced by the nascent Islamic finance industry and compares the Australian experience to developments in the UK It contributes to a greater understanding of how Muslims living as a minority in Australia and the UK negotiate Islamic doctrine in secular societies by focusing on one aspect of this negotiation namely the prohibition of rib There is little debate in the Islamic tradition on the prohibition of rib The differences however lie in the interpretation of rib and the question of how Muslims live in a society that is heavily reliant on interest and conventional banking yet at the same time adhere to Islamic guidelines Through the words of religious leaders Muslim professionals and university students Imran Lum provides real accounts of how Muslims in Australia and the UK practically deal with conventional banking and finance products such as home loans savings accounts and credit cards He also explores Muslim attitudes towards Islamic finance and queries whether religion is the sole determining factor when it comes to its uptake Drawing on his own unique experience as a practitioner responsible for growing an Islamic business in a conventional bank Lum provides a firsthand account of the complexities associated with structuring Islamic finance products that are not only sharia compliant but also competitive in a non Muslim jurisdiction Using uk k bonds as a case study he highlights the tangible and non tangible barriers to product development such as tax and regulatory requirements and the rise of Islamophobia Combining academic and industry experience Lum unpacks the relationship of Islamic finance with Muslim identity construction in the West and how certain modalities of religiosity can lead to an uptake of Islamic finance while others can lead to its rejection **The Oxford**

Border Crossings Fred Reinhard Dallmayr,1999-01-01 Comparative political theory is at best an embryonic and marginalized endeavor As practiced in most Western universities the study of political theory generally involves a rehearsal of the canon of Western political thought from Plato to Marx Only rarely are practitioners of political thought willing and professionally encouraged to transgress the canon and thereby the cultural boundaries of North America and Europe in the direction of genuine comparative investigation Border Crossings presents an effort to remedy this situation fully launching a new era in political theory Thirteen scholars from around the world examine the various political traditions of West South and East Asia and engage in a reflective cross cultural discussion that belies the assumptions of an Asian essence and of an unbridgeable gulf between West and non West The denial of essential differences does not however amount to an endorsement of essential sameness As viewed and as practiced by contributors to this ground breaking volume comparative political theorizing must steer a course between uniformity and radical separation this is the path of border crossings

Hafez, 2003

Western theoretical approaches of modernization development social progress and interaction have failed to understand the dynamics of the Islamic revival Deina Abdelkader in this seminal work argues that questions of social justice are indelibly tied to the phenomenon of contemporary Islamic resurgence as the quest for social justice is in fact motivated by the Shari ah hence an integral part of Islamic life and weltan shauung Using the two tools of maqasid and maslahah and through the examination of the dialectical link between fiqh and reality the author shows their indispensability as important methodological tools for the study of the social sciences and indeed of social phenomena
