Ideas for a Hermeneutic Phenomenology of the Natural Sciences Joseph J. Kockelmans, 1993-07-31 I have always had a great interest in the philosophy of science At first this interest led to reflections on the mathematical sciences I later my focus shifted to the natural sciences 2 during the past twenty years or so my interest has also included the behavioral social and historical sciences From the very start my interest was always combined with a concern for the history of the sciences In philosophy of science proper my main interest was not in logical methodological or even epistemological issues although I obviously studied and taught the most important insights proposed in the leading publications in this large field of study My concern has always been predominantly ontological and in that area I have approached the relevant issues from a 4 phenomenological perspective For what follows it is perhaps of some importance to mention here that I came to phenomenology in a rather indirect way through the philosophy of Nicolai Hartmann Yet it was mainly the influence of Herman Van Breda and Alphonse De Waelhens which led me directly to Husserl's phenomenology At first I focused almost exclusively on Husserl's phenomenology Later I moved in the direction of the philosophy of Merleau Ponty and 1 Cf Joseph J Kockelmans Philosophy of Mathematics in the Middle Ages in Dutch Langemark Vonksteen 1953 On the Mode of Being of Mathematical Entities in Dutch in Tijdschrift voor Philosophie 16 1954 pp 289-331 2 Joseph J Kockelmans On Time and Space

*Myth in the Modern Novel* Liisa Steinby, 2023-03-20 Myth in the Modern Novel Imagining the Absolute posits a twofold thesis First although Modernity is regarded as an era dominated by science and rational thought it has in fact not relinquished the hold of myth a more primitive form of thought which is difficult to reconcile with modern rationality Second some of the most important statements as to the reconcilability of myth and Modernity are found in the work of certain prominent novelists This book offers a close examination of the work of eleven writers from the late eighteenth century to the beginning of the twenty first representing German French American Czech and Swedish literature The analyses of individual novels reveal a variety of intriguing views of myth in Modernity and offer an insight into the modernizing transformations myth has undergone when applied in the modern novel The study shows the presence of the subconscious the mythic layer in modern western culture and how this has been dealt with in novelistic literature

*Myth and Science* Tito Vignoli, 2019-12-05 In Myth and Science Tito Vignoli masterfully navigates the complex interplay between mythological narratives and scientific paradigms offering a profound analysis of how these seemingly disparate realms intersect Through a rich tapestry of textual interpretation and philosophical inquiry Vignoli employs a unique literary style that blends rigorous argumentation with evocative prose The book situates itself within contemporary debates regarding the

epistemological boundaries of myth and science drawing on extensive historical and cultural examples to illustrate how myths have shaped scientific thought throughout the ages all while challenging readers to reconsider established dichotomies Tito Vignoli an esteemed scholar in the fields of anthropology and philosophy brings a wealth of knowledge drawn from his extensive academic background and personal experiences His interdisciplinary approach is informed by years of research into the cultural significance of myth and its implications for modern science Vignoli s exploration of this relationship is influenced by his belief that understanding myth is essential for comprehending human cognition and societal development which propels his arguments throughout the text This book is highly recommended for readers interested in philosophy cultural studies and the sociology of science Vignoli s engaging prose and incisive insights will not only challenge your assumptions about the realms of myth and science but will also inspire a deeper appreciation for the intricate ways in which both shape human experience

*Alfred Loisy and the Making of History of Religions* Annelies Lannoy,2020-08-10 This monograph studies the professionalization of History of religions as an academic discipline in late 19th and early 20th century France and Europe Its common thread is the work of the French Modernist priest and later Professor of History of religions at the Collège de France Alfred Loisy 1857-1940 who participated in many of the most topical debates among French and international historians of religions Unlike his well studied Modernist theology Loisy s writings on comparative religion and his rich interactions with famous scholars like F Cumont M Mauss or J G Frazer remain largely unknown This monograph is the first to paint a comprehensive picture of his career as a historian of religions before and after his excommunication in 1908 Through a contextual analysis of publications by Loisy and contemporaries and a large corpus of private correspondence it illuminates the scientification of the discipline between 1890-1920 and its deep entanglement with religion politics and society Particular attention is also given to the role of national and transnational scholarly networks and the way they controlled the theoretical and institutional frameworks for studying the history of religions
