## Mythistory And Other Essays:

**Mythistory and Other Essays** William Hardy McNeill, 1986      *Mythistory and Other Essays* William H. McNeill, 2008-11      **Anthropologists and the Rediscovery of America, 1886-1965** John S. Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective      **Narrating the Nation** Stefan Berger, Linas Eriksonas, Andrew Mycock, 2008 A sustained and systematic study of the construction erosion and reconstruction of national histories across a wide variety of states is highly topical and extremely relevant in the context of the accelerating processes of Europeanization and globalization However as demonstrated in this volume histories have not of course only been written by professional historians Drawing on studies from a number of different European nation states the contributors to this volume present a systematic exploration of the representation of the national paradigm In doing so they contextualize the European experience in a more global framework by providing comparative perspectives on the national histories in the Far East and North America As such they expose the complex variables and diverse actors that lie behind the narration of a nation      *The New World History* Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field The forty four articles in this book take stock of the history evolving literature and current trajectories of new world history These essays together with the editors introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts approaches and insights valuable to their own work The selections are organized in ten chapters that survey the history of the movement the seminal ideas of founding thinkers and today s practitioners changing concepts of world historical space and time comparative methods environmental history the big history movement globalization debates over the meaning of Western power and ongoing questions about the intellectual premises and assumptions that have shaped the field      *That Noble Dream* Peter Novick, 1988-09-30 The aspiration to relate the past as it really happened has been the central goal of American professional historians since the late nineteenth century In this remarkable history of the profession Peter Novick shows how the idea and ideal of objectivity were elaborated challenged modified and defended over the last century Drawing on the unpublished

correspondence as well as the published writings of hundreds of American historians from J Franklin Jameson and Charles Beard to Arthur Schlesinger Jr and Eugene Genovese That Noble Dream is a richly textured account of what American historians have thought they were doing or ought to be doing when they wrote history how their principles influenced their practice and practical exigencies influenced their principles The Thinking Historian Eric W. Sager, 2025-01-27 What is history What are historians doing when we create our histories The need for answers is more urgent than ever We live in an era when history is often rejected or ignored and when all teachers of history confront formidable challenges In the culture of screen capitalism and social media historical knowledge is evaded in an expanding present minded consciousness How can history be defended and what is it that we are defending This book argues that history is a mode of thinking a form of imaginative reasoning with its own informal logic In non technical language and using examples from important works of history the book defines core elements in historical thinking These include contingency complexity temporality parts and wholes consilience perspectives analogy and abduction These elements are subsumed into the concept of imaginative reasoning The overall argument echoes the work of hermeneutic philosophers History is a disciplined imagination tempered and empowered by its forms of reasoning It embraces ethical imperatives that the historian has a duty to declare Equipped with such understanding historians may answer the many rejections of history and secure its place in our shared futures

**Theory and History in International Relations** Donald J. Puchala, 2013-01-11 Theory and History in International Relations is an eloquent plea to scholars of global politics to turn away from the manufacture of data and return to a systematic study of history as a basis for theory While the modest use of empiricism will always be important Puchala rejects the logical positivism of the so called scientific revolution in the field in favor of a more complex even intuitive vision of global politics He addresses the potential uses of history in studying some of the major debates of our time the Cold War as a struggle between empires the collision of civilizations cultural encounters and colonies in the ancient world and liberal approaches to the understanding of history and ethical contributions to the dialogue over theory *The Changing Image of the Sciences* Ida H. Stamhuis, Teun Koetsier, Cornelis De Pater, Albert Van Helden, 2012-12-06 The title of our book would lead the reader to believe that in speaking of the changing image of the sciences we are taking for granted the multiplicity of sciences as these are practiced for instance in modern universities That was of course not always the case Although we can point to some subjects for instance mathematical astronomy as being demarcated to some extent from other subjects as far back as Antiquity the current division into individual sciences can hardly be traced back further than the nineteenth century Moreover the further we go back in history the more we must subsume science under general knowledge or scholarship scientia Some of the earliest images of episteme or scientia are those of forbidden knowledge often related to technology on the one hand and the absent minded scholar on the other These are powerful metaphors in word as well as image that have been appropriated in various ages for different purposes The Greeks gave Western society its first images of the power

of knowledge and those who produced it Prometheus ridiculed the gods stole their fire and brought it down to Earth For this Zeus had him chained to a rock on Mount Caucasus where a vulture fed on his liver during the day while it grew back at night He was finally freed by Heracles **Transforming History** Brian Moloughney, Peter Zarrow, 2012-02-03

*Transforming History* examines the profound transformation of historical thought and practice of writing history from the late Qing through the midtwentieth century The authors devote extensive analysis to the common set of intellectual and political forces that shaped the study of history from the ideas of evolution positivism nationalism historicism and Marxism to political processes such as revolution imperialism and modernization Also discussed are the impact and problems associated with the nationstate as the subject of history the linear model of historical time and the spatial system of nationstates The result is a convincing study that illustrates how history has transformed into a modern academic discipline in China

make these traditions appear conceptually incompatible the potential critical force of a theoretical reconciliation inspired several attempts in the twentieth century to articulate a phenomenological Marxism Updating and extending this approach the contributors to this volume identify and develop new and previously overlooked connections between the traditions offering new perspectives on Marx Husserl and Heidegger exploring themes such as alienation reification and ecology and examining the intersection of Marxism and phenomenology in figures such as Michel Henry Walter Benjamin and Frantz Fanon These glimpses of a productive reconciliation of the respective strengths of phenomenology and Marxism offer promising possibilities for illuminating and resolving the increasingly intense social crises of capitalism in the twenty first century
