Nurse Educators and Politics Sondra Z. Koff, 2012-02-01 Although they represent a significant majority of American health care providers, nurses have had only a limited influence on policy developments in the health care and political systems. Helping to understand why the profession has remained a sleeping giant, *Nurse Educators and Politics* focuses on a primary socialization agent to the profession: nursing faculty members. Using survey data, Sondra Z. Koff examines nurse educators' attitudes toward select public policies and political participation, as well as their political and organizational

activism These findings are related to nursing's professional history and are discussed in a broader political context to better understand nurses' behavior in the decision making process

argues that feminism helped end nursing's subordination to medicine and provided nurses with greater autonomy and professional status. She discusses two distinct eras in nursing history. The first extended from the mid 1960s to the mid 1980s when feminism seemed to belittle the occupation in its analysis of gender subordination but also fueled nursing leaders' drive for greater authority and independence. The second era began in the mid 1980s when feminism grounded in the ethics of care appealed to a much broader group of caregivers and was incorporated into nursing education. While nurses accepted aspects of feminism, they did not necessarily identify as feminists. Nonetheless, they used, passed on, and developed feminist ideas that brought about nursing school curricula changes and the increase in self-directed and specialized roles available to caregivers in the twenty-first century.

The Encyclopedia of Human Ecology Julia R. Miller, Richard M. Lerner, Lawrence B. Schiamberg, Pamela M. Anderson, 2003-08-13

The first and only source to integrate the multiple disciplines and professions exploring the many ways people interact with the natural and designed environments in which we live. Comprising more than 250 informative entries, *The Encyclopedia of Human Ecology* examines the interdisciplinary and complex topic of human ecology. Knowledge gathered from disciplines that study individuals and groups is blended with information about the environment from the fields of family science, geography, anthropology, urban planning, and environmental science. At the same time, professions intended to enhance individual and family life—marriage and family therapy, clinical psychology, social work, dietetic, and other health professions—are represented alongside those concerned with the preservation, conservation, and management of the environment and its resources. How rampant are eating disorders among our youth? Are AIDS educational programs effective? What problems do adolescents transitioning into adulthood encounter? Here, four leading scholars in the field have assembled a team of top-tier psychologists, sociologists, anthropologists, and other experts to explore these and hundreds of other timely issues.
