of the Dutch Golden Age Adam Sundberg,2022-01-27 By the early eighteenth century the economic primacy cultural efflorescence and geopolitical power of the Dutch Republic appeared to be waning The end of this Golden Age was also an era of natural disasters Between the late seventeenth and the mid eighteenth century Dutch communities weathered numerous calamities including river and coastal floods cattle plagues and an outbreak of strange mollusks that threatened the literal foundations of the Republic Adam Sundberg demonstrates that these disasters emerged out of longstanding changes in environment and society They were also fundamental to the Dutch experience and understanding of eighteenth century decline Disasters provoked widespread suffering but they also opened opportunities to retool management strategies expand the scale of response and to reconsider the ultimate meaning of catastrophe This book reveals a dynamic and often resilient picture of a society coping with calamity at odds with historical assessments of eighteenth century stagnation

Five educational researchers coming from a variety of higher education institutions academic disciplines and cultural backgrounds met together over a three year period to discuss the present and future of doctoral education and training in the field of education Their hope was that the product of their discussions would enable educators and policy makers around the world to rethink restructure and even design new programs to prepare the rising generation of educational researchers in their countries These differences in academic national and institutional perspectives led to a variety of ways even conflicting ones in which the quality of doctoral education and training could be improved Based on our discussion we came to the conclusion that there are no universal solutions to the problems involved in setting up and operating a quality doctoral program Rather educators would be wise to be aware of the alternatives at their disposal and make informed choices based on an understanding of the larger societal and political contexts in their states regions or nations To facilitate this decision making process we have chosen to conclude with a set of key questions that should be addressed by those seeking to

examine and improve their doctoral programs in education and briefly describe some of the alternative ways of answering these questions. Instead of passively absorbing a unified position, then, the reader is invited to join the dialogue that has taken place and is still taking place between and among the authors. To exemplify such a dialogue, each chapter is followed by one or two commentaries written by members of the group. We would encourage the reader to write commentaries on the individual chapters and perhaps the commentaries thereby engaging in a dialogue with the authors on a fairly personal level.
