

Social & Behavior Change in Nutrition: What Works?

Nutrition programs are meaningful only to the degree that they help people do something differently. That is where social and behavior change (SBC) methods can help. In our experience, we have seen program planners miss opportunities to achieve much bigger and more lasting impact of their SBC work. The nine tips we offer here show you what you can do at each stage of a program cycle to avoid missing such great opportunities and to contribute to real, positive changes in people's lives.

PROJECT DESIGN

1. Plan an ongoing, iterative workflow of the ever-evolving and flexible activities, usually in a cycle, with the opportunity to refine and improve as design understanding, data generated, resources, and the target audience and their behavior change needs evolve over time. (Figure 1)

2. Develop a strong assessment: Conduct a baseline assessment to design – and then refine the design based on what you learn about existing, and emerging, behavior change needs. It is important to understand what you do not know as well as what you do know. The baseline assessment is a critical opportunity to design a baseline assessment that is relevant to the target audience and the behavior change needed to achieve the desired outcome.

3. Develop the key objectives: Identify the key objectives – the specific, measurable, achievable, relevant, and time-bound (SMART) objectives – that will guide the design and implementation of the program. These objectives should be derived from the assessment and the behavior change needs identified.

EVALUATION

9. Evaluate: Evaluate the program and its results. Use only evidence-based methods to evaluate the program and its results. Use a mix of quantitative and qualitative methods to evaluate the program and its results. Use the evaluation to inform the design and implementation of the program.

Abstract: Nutrition programs are meaningful only to the degree that they help people do something differently. That is where social and behavior change (SBC) methods can help. In our experience, we have seen program planners miss opportunities to achieve much bigger and more lasting impact of their SBC work. The nine tips we offer here show you what you can do at each stage of a program cycle to avoid missing such great opportunities and to contribute to real, positive changes in people's lives.

PROJECT INCEPTION

4. Develop a strong assessment: Conduct a baseline assessment to design – and then refine the design based on what you learn about existing, and emerging, behavior change needs. It is important to understand what you do not know as well as what you do know. The baseline assessment is a critical opportunity to design a baseline assessment that is relevant to the target audience and the behavior change needed to achieve the desired outcome.

5. Develop the key objectives: Identify the key objectives – the specific, measurable, achievable, relevant, and time-bound (SMART) objectives – that will guide the design and implementation of the program. These objectives should be derived from the assessment and the behavior change needs identified.

6. Develop a strong assessment: Conduct a baseline assessment to design – and then refine the design based on what you learn about existing, and emerging, behavior change needs. It is important to understand what you do not know as well as what you do know. The baseline assessment is a critical opportunity to design a baseline assessment that is relevant to the target audience and the behavior change needed to achieve the desired outcome.

IMPLEMENTATION AND MONITORING

7. Implement and monitor: Implement the program and monitor its results. Use only evidence-based methods to implement and monitor the program and its results. Use a mix of quantitative and qualitative methods to implement and monitor the program and its results. Use the implementation and monitoring to inform the design and implementation of the program.

8. Evaluate: Evaluate the program and its results. Use only evidence-based methods to evaluate the program and its results. Use a mix of quantitative and qualitative methods to evaluate the program and its results. Use the evaluation to inform the design and implementation of the program.
