Interventional Cardiology and Cardiac Catheterisation John Edward Boland,David W. M. Muller,2019-04-24 Cardiology is

becoming an increasingly complex field understood by only a select group of medical specialists This publication demystifies many difficult topics in interventional cardiology and cardiac catheterisation commencing with the basics of laboratory instrumentation and technology and progressing to a comprehensive review of both new and established cardiac interventions Unlike other publications that are directed mainly towards clinicians this text is specifically written to assist newcomers such as medical trainees nurses technicians scientific staff and other allied health professionals understand the wonders of interventional cardiology and includes extensive explanations of the techniques of angiography and new percutaneous The comprehensive information presented herein written by recognised specialists in their respective fields will no doubt prove of great benefit to clinician and non medical specialist alike Nuclear Medicine Textbook Duccio Volterrani, Paola Anna Erba, Ignasi Carrió, H. William Strauss, Giuliano Mariani, 2019-08-10 Building on the traditional concept of nuclear medicine this textbook presents cutting edge concepts of hybrid imaging and discusses the close interactions between nuclear medicine and other clinical specialties in order to achieve the best possible outcomes for patients Today the diagnostic applications of nuclear medicine are no longer stand alone procedures separate from other diagnostic imaging modalities This is especially true for hybrid imaging guided interventional radiology or surgical procedures Accordingly today's nuclear medicine specialists are actually specialists in multimodality imaging in addition to their expertise in the diagnostic and therapeutic uses of radionuclides This new role requires a new core curriculum for training nuclear medicine specialists This textbook is designed to meet these new educational needs and to prepare nuclear physicians and technologists for careers in this exciting specialty **Radioactivity in the Environment** Vlado Valkovic, 2019-04-17 Radioactivity in the Environment Second Edition presents the facts on the presence of both natural and manmade radionuclides in the environment Sources of ionizing radiation that can lead to human exposure are discussed including natural sources nuclear explosions nuclear power generation the use of radiation in medical industrial and research purposes and radiation emitting consumer products In this thoroughly updated edition users will find new sections on developments in radioactive nuclides in nature and technologically modified exposure to natural radiation new threats by terrorist individuals groups and countries changes to the status of nuclear power in the world and more Additional new sections cover radioisotopes in geo prospecting and the oil industry the use of radiation in environmental protection detector types and detectors used for personal dosimetry the Dirty Bomb the Fukushima accident and North Korea testing sites and nuclear capabilities Includes details of analytical laboratory procedures for radioactivity measurement in different samples Features a new chapter on decontamination after radiation exposure Expands the discussion on nuclear fusion to cover ITER and other installations *Status and Trends in Spent Fuel and Radioactive Waste Management* IAEA, 2022-01-10 This publication provides a global overview of the status of spent fuel and radioactive waste management programmes inventories current practices technologies and trends It presents information on national arrangements for the management of spent fuel and radioactive waste and on current waste and
