Radical Innovation and Open Innovation: Creating New Growth Opportunities for Business Khanh Pham-Gia, 2011-02 Henry Chesbrough the Harvard professor and a worldwide expert for Open innovation has stated that most innovations fail And companies that don't innovate die In Germany only less than 0.5 % ideas pursuing by industrial companies has led to a success The question being addressed is how companies can drive innovations effectively and efficiently to create new growth opportunities particularly in this difficult time due to the global economic crisis These challenges could be captured by driving radical innovations using open innovation methodology Radical innovations can create new markets and huge growth potential for the business meanwhile breakthrough innovations can be developed faster and cheaper via open innovation approach The aim of this study is to provide a deep insight into radical innovation and open innovation management based on a thorough literature research and evaluation Thereby basic concepts of the both innovation models are explored and compared with other innovation types e.g. incremental and closed innovations Moreover the Christensen's model of disruptive innovation and Chesbrough's theory about open innovation are explained into details In addition opportunities and challenges as well as managing concept of radical and open innovations are analyzed and illuminated with concrete examples and cases amongst others the eco friendly Light Emitting Diode LED Beside technology and market breakthroughs other aspects like future market trend key success factors and strategies for capturing sustainable growth of disruptive LED technologies in the lighting industry are studied It could be stated that companies should drive intensively open innovation and boost the outside in and inside out processes for creating new breakthroughs in LED technologies Increased involving customers suppliers and the outside scientific world into internal R D strengthened collaboration within the LED supply chain and intensified out licensing of own technologies help companies to accelerate the innovation process and create new markets Besides driving forceful innovation management companies should boost their new product development by exploitation of government supports which have been increased due to the current global climate change problems

Sustainable Innovation and Entrepreneurship Rolf Wüstenhagen, 2008-01-01 When I received the review copy I was rather excited the book as a collection of research papers that in themselves are very interesting and provide a fast track into the literature of the subject in question it is a worthwhile purchase to support thinking on entrepreneurship and innovation in a world where the sustainability agenda is increasingly becoming the agenda for inventors entrepreneurs and those who fund them or invest in their companies All the papers are well written and scholarly A particularly strong feature of the chapters is the range of sources quoted at the end of each

chapter These references provide pathways into many different literatures that might save much time for subsequent researchers Lorraine Warren International Journal of Entrepreneurial Behaviour and Research In recent years our understanding of corporate sustainability has moved from exploitation to exploration from corporate environmental management to sustainable entrepreneurship and from efficiency to innovation Yet current trends indicate the need for radical innovation via entrepreneurial start ups or new ventures within existing corporations despite difficulties with the financing and marketing of such efforts Presenting both conceptual and empirical research this fascinating book addresses how we can combine environmental and social sustainability with economic sustainability in order to produce innovative new business models The international cast of contributors addresses the wide range of issues in the balance between growth and environmental concerns The first five chapters discuss various aspects of sustainable entrepreneurship This is followed by two chapters that look at innovation within existing firms Innovation is not successful until it finds a customer so the two chapters that follow delve into the marketing aspects of business to consumer and business to business settings The book closes with a broad discussion of the evolution and future of the research agenda into the intersection of sustainability innovation and entrepreneurship Academics students business professionals and NGOs will find this volume enlightening and useful

Innovation and Internationalisation Stuart Orr, Jane Menzies, Connie Zheng, Sajeewa 'Pat' Maddumage, 2017-11-28 This book provides a comprehensive examination of the many factors that influence the internationalisation of SMEs into China. SMEs represent more than 50 percent of the economic activity and employment in China. This book explores the experiences of SMEs that have internationalised to China from Australia. Australian SMEs are at the forefront of foreign SMEs in China with over 5000 Australian SMEs currently operating in China and a long history of association. The book is unique in that it presents a multidisciplinary perspective of the subject considering seven different discipline perspectives: internationalisation, innovation, entrepreneurship, networks, resources, human resource management, and barriers and liabilities. This makes the book one of the most comprehensive treatments of internationalisation to China so far. Each chapter in the book deals with a different perspective and includes its own separate analysis. The chapters commence with a consideration of the current knowledge on internationalising to China for each perspective, analyse the interviews of representatives of 35 SMEs operating in China, and then draw conclusions which are relevant to students, scholars, and professionals. Each chapter includes extensive examples from the interviews. This integrated book is particularly useful for small business owners, international business management consultants, instructors, and students.

The Routledge Companion to Innovation Management Jin Chen, Alexander Brem, Eric Viardot, Poh Kam Wong, 2019-02-14 Innovation contributes to corporate competitiveness, economic performance, and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic framework of innovation and innovation management. It also presents innovation management from the perspectives of strategy, organization, and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.
