Flying Radio-Controlled Model Aircraft Colin Bedson, 2007-08-01 Flying radio controlled model aircraft is one of the most enjoyable and absorbing hobbies that there is. It combines the fun of building and maintaining a real miniature aircraft with the challenge of flying it just like the real thing and keeping the appropriate distance between the aircraft and the ground at all times. But the early stages of the hobby can be a steep learning curve and it is all too easy to be put off by early mishaps. This book explains the principles of model flight in an easy to read text. It is a flight manual for any pilot of a fixed wing model aircraft and includes details of internal combustion and electric powered flight. It gives all the information required to become a successful pilot in the shortest possible time.
