Galasko, Ian Isherwood, 2012-12-06 Recent years have witnessed major developments in diagnostic imaging methods. The facilities for these new methods are sometimes expensive and not always accessible yet they continue to improve and to change It is essential that those concerned with orthopaedic imaging should appreciate not only recent developments but also the changes likely to occur during the next few years It is also important that the indications contraindications uses and complications for each individual imaging technique should be understood. This book is an attempt to provide such information for orthopaedic surgeons diagnostic radiologists and other clinicians par ticularly those in training or those who are involved in management of patients with disorders of the musculoskeletal system In the first part of the book the different imaging techniques are discussed with emphasis on advantages and disadvantages indications and contraindica tions In the second part authors have been asked to discuss ways in which specific groups of disorders might be investigated It is hoped that the reader will obtain from this section a balanced view of the different diagnostic imaging methods the indications for their use and the sequence in which they might be carried out The Editors are grateful to aU authors for the time and work they have put into their individual chapters They are also grateful to the publishers in particular Michael Jackson for help given in the preparation of this book Manchester C S B Galasko I Current Catalog National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 Multiplanar CT of the Spine Stephen L. Computed Tomography of the Spine and Spinal Cord Thomas H. Newton, D. Gordon Potts, 1983 Spinal Meningiomas A. Pansini, F. Lo Re, P. Conti, E. Montali, G. De Luca, 2012-12-06 Since Harvey Cushing's extensive study on brain meningiomas no similar study has been conducted on spinal cord meningiomas. The high scientific value of this book is based on the careful elaboration of data from patients affected by spinal meningiomas who have been examined and operated on over the last 33 years 1962 1995 at the Neurosurgical School of the University of Florence Italy The main focus of this study was on the anatomic and clinical relationship that enabled early diagnosis of spinal meningiomas More over this book emphasizes the interaction between neurology and neuroradiology in the form of dynamic neurology Myeloradiculographic findings are described together with those using more recent techniques such as CT and MRI NIDA Research Monograph ,1976 Central Nervous System Trauma Status Report [1985] Donald P. Becker, John T. Povlishock, 1985 Cervical Spine II Rene Louis, Andreas Weidner, 2012-12-06 The second common meeting of the European Section and the Cervical Spine Research Society took place in Marseille France from June 12 to 15 1988 and was organized by Rene Louis More than

130 specialists from every part of Europe from America and Asia participated representing among others the fields of Orthopedics Neurosurgery Traumatology Neurology Anatomy Rheumatology and Radiology This meeting again was convincing proof of the growing interest which exists in Europe in research into injuries and diseases of the cervical spine. The main topics of this meeting were the subluxation of the lower cervical spine chapter 1 and the infectious diseases of the cervical spine chapter 2 Chapters 3 and 4 of this volume deal with degenerative lesions and the upper cervical spine. In chapter 5 experimental reports are presented so that a good synopsis is provided of our present state of knowledge of diseases of the cervical spine. The European Section of the Cervical Spine Research Society was founded by Mario Boni in 1984 who unfortunately died in 1986 and was proclaimed Honory President of the European Section There is a European meeting every summer and one every three years with our colleagues from the United States of America Canada and Japan organized in Europe The first combined meeting was organized by Pierre Kehr in Strasbourg France in 1985 and the presented papers were published in Cervical Spine I Springer Wien New York 1987

Drape, Daniel Maitrot, Bernard Woerly, Jean Tongio, 2012-12-06 The ever increasing interest in the spine and its pathology is not surprising Acting as the main support of an erect posture unique in the animal kingdom the human spine is owing to its numerous articulations at the same time a supple structure that can respond to the many stresses which are put on it Constant movement is necessary to preserve its function but regular and well is also essential The high frequency of spinal disorders result positioned rest ing from misuse is easily explained by day to day reality Among the disorders that result from misuse of the spine herniated disk leading to radicular compression is one of the most frequent New tech niques less invasive and yielding more precise information have been pro gressively developed for the diagnosis of this disease and at the same time new methods of treatment have appeared giving us a much broader range of choices and decisions to make In the face of this evolving complex situation a multidisciplinary team from Strasbourg decided to clarify the topic A single man's experience what ever his qualities would certainly have been insufficient and the necessarily limited views of a single speciality would also have been a handicap This re markable work is thus the result of collaboration between clinical and inter ventional radiologists and a neurosurgeon **Computed Tomography of the Whole Body** John AJNR, American Journal of Neuroradiology ,1989 Robert Haaga, Ralph J.
