theory as well as between basic and applied actinide chemistry The text covers the basic science used in contemporary studies of the actinide systems from basic synthesis to state of the art spectroscopic and computational techniques The authors provide contemporary overviews of each topic area presented and describe the current and anticipated experimental approaches for the field as well as the current and future computational chemistry and materials techniques In addition the authors explore the combination of experiment and theory This important resource Provides an essential resource the reviews the key aspects of contemporary actinide research Includes information on new advances in experiment and theory and the interplay between the two Covers the basic science used in contemporary studies of the actinide systems from basic synthesis to state of the art spectroscopic and computational techniques Focuses on the interplay between multiple experiments and theory as well as between basic and applied actinide chemistry Written for academics students professionals and researchers this vital text contains a thorough review of the key aspects of actinide research and explores the most recent advances in experiment and theory

Energy Research Abstracts, 1993 **Sediments and Water Interactions** Peter G. Sly, 2012-12-06 The first symposium on sediment freshwater interactions was held in Amsterdam in 1976 and the second was held at Kingston Ontario Canada in 1981 The third symposium was held at the University of Geneva in 1984 and also included a number of contributions dealing with sediment saltwater interactions It is expected that future symposia of this series will retain this approach and that the revised symposium title will remain the same for later proceedings of these meetings Because of the large number of submissions in 1984 many were given as poster presentations Extended abstracts of all contributions to the Geneva symposium appear in *Interactions Between Sediments and Water* C E P Consultants Ltd 26 Albany St Edinburgh EH1 3QH U K 1984 Full length papers appear only in the proceedings The format of the third symposium was similar to its predecessors The location provided a particularly good opportunity for attendance by European scientists who represented about 81% of the participants About 16% came from North America and 3% were from Southeast Asia and Australia It is unfortunate that there were no contributors from either Africa or South America or other parts of Asia In all 16 countries were represented at this symposium In a continuing attempt to provide equal opportunities for attendance by scientists from other parts of the world it is planned to hold the next symposium in Australia in 1987 Further information about the symposia series can be obtained from Dr E D Radioactive Waste Confinement S. Norris, J. Bruno, M. Van Geet, E. Verhoef, 2017-05-04 It is internationally accepted that the safest and most sustainable option for managing radioactive waste is geological disposal utilizing both engineering and geology to isolate the waste and contain the radioactivity This Special Publication contains 25 scientific studies presented at the 6th conference on Clays in natural and engineered barriers for radioactive waste confinement held in Brussels Belgium in 2015 The conference and this resulting volume cover many of the aspects of clay characterization and behaviour considered at various temporal and spatial scales relevant to the confinement of radionuclides in clay from basic phenomenological process descriptions to the global

understanding of performance and safety at repository and geological scales The papers in this volume consider research into argillaceous media under the following topic areas large scale geological characterization general strategy for clay based disposal systems geomechanics mass transfer bentonite evolution and gas transfer The collection of different topics presented in this Special Publication demonstrates the diversity of geological repository research A Selected, Annotated Bibliography of Studies Relevant to the Isolation of Nuclear Wastes ,1980 *Selected Water Resources Abstracts* ,1991-03
