Rail Quality And Maintenance For Modern Railway Operation:

Rail Quality and Maintenance for Modern Railway Operation J.J. Kalker,D.F. Cannon,O. Orringer,1993-07-31 This volume presents a collection of papers on the theme of rail integrity which were presented at a meeting in Delft from 24 26th June 1992 Rolling contact fatigue is a failure mode which is increasingly being recognised as a threat to the reliability of modern heavy freight and high speed railway systems These papers describe the current understanding of the problem and what rail steel technology and maintenance procedures have to offer to combat it

Rail Quality and Maintenance for Modern Railway Operation J.J. Kalker,D.F. Cannon,O. Orringer,2013-04-18 In April 1990 a conference was held at the Cracow Institute of Technology Cracow Poland The title of that conference was Residual Stresses in Rails Effects on Rail Integrity and Railroad Economics and its themes were the measurement and prediction of residual stresses in rails but as the sub title suggests the intention was also to provide a link between research and its application to the practical railway world At the Cracow conference there were 40 participants with 5 railways and 5 rail makers being represented and 25 papers were given The Cracow conference was a success and by March 1991 its off spring The International Conference on Rail Quality and Maintenance for Modern Railway Operations was conceived and birth was ultimately given in June 1992 at the Technical University Delft It turned out to be some baby with 112 delegates from 24 countries taking part As with its predecessor the conference was to provide a forum for the exchange of ideas between research investigators rail makers and railway engineers A cursory examination of the list of participants suggests that about 57% were from the railway industry 34% from universities and other research institutions and 9% from the steel industry Bearing in mind that some of the railway industry participants were from their respective research and development organisations the balance of interests was about right

Handbook of Railway Vehicle Dynamics Simon Iwnicki,2006-05-22 Understanding the dynamics of railway vehicles and indeed of the entire vehicle track system is critical to ensuring safe and economical operation of modern railways As the challenges of higher speed and higher loads with very high levels of safety require ever more innovative engineering solutions better understanding of the technical issues a Handbook of Residual Stress and Deformation of Steel George E. Totten,2002 Annotation Examines the factors that contribute to overall steel deformation problems The 27 articles address the effect of materials and processing the measurement and prediction of residual stress and distortion and residual stress formation in the shaping of materials during hardening processes and during manufacturing processes Some of the topics are the stability and relaxation behavior of macro and micro residual stresses stress determination in coatings the effects of process equipment design the application of metallo thermo mechanic to quenching inducing compressive stresses through controlled shot peening and the origin and assessment of residual stresses during welding and brazing Annotation c Book News Inc Portland OR booknews com
