Such as what is the incubation time for those robin eggs sitting in the nest above the porch light? What kinds of flowers attract humming birds? What are the migratory distances of various species? What are the major causes of bird deaths? *The Bird Almanac* is an invaluable resource impressive in scope and depth and complemented with tables and illustrations. This Second Edition has been reformatted for easier use and now features quick find tabs and an index. The first section of the book comprehensively covers the history, biology and behavior of birds. Bird physiology, biological systems and anatomy are explained in easy to understand terms and annotated illustrations. Other topics include Fossil history of birds, Reproduction and mortality, Threatened and endangered species, Major birding festivals and competitions, How to attract specific species to the backyard. Extensive resources for bird lovers including the top birding locations in America, Birding code of ethics. The second section consists of an authoritative world checklist of bird species. The birds are organized by taxonomic order and listed by common and Latin name.
