Rains Asia An Assessment Model For Acid Deposition In Asia:

Rains-Asia Robert J. Downing, Ramesh Ramankutty, Jitendra J. Shah, 1997-01-01 Asia's rapid economic growth has fueled a growing appetite for commercial energy which is satisfied by fossil fuels that emit pollutants. These pollutants are oxidized and transported into the atmosphere creating acidic depositions known as acid rain that can damage foliage, soils and surface waters. At current energy consumption growth rates by the year 2000 sulfur dioxide emissions from Asia will surpass the emissions of North America and Europe combined. RAINS ASIA is an assessment tool developed by the World Bank, the Asian Development Bank and donors to study the implications of alternative energy development strategies for air pollution and acid rain and to help identify cost effective abatement methods. This report provides an overview of the model and some results of analyses that have been conducted as part of the RAINS ASIA program.

Acid Rain - Deposition to Recovery Peter Brimblecombe, Hiroshi Hara, Daniel Houle, Martin Novak, 2007-12-11 This book looks at the sources and composition of the atmosphere and rainfall with particular attention on acidifying components and those that affect ecosystems. It further widens the subject to look at trace metals. It includes papers on the impact of deposition on soils and forests and the recovery of the natural environment. Work on critical loads makes a contribution to understanding the degree to which deposition must be reduced to limit its impact.

Acid rain 2000 Kenichi Satake, 2012-12-06 The Acid Rain 2000 Conference in Tsukuba, Japan held 10-16 December 2000 was the sixth such conference in the series starting with Columbus, Ohio, USA in 1975 and including Sandefjord, Norway in 1980, Muskoka, Canada in 1985, Glasgow, UK in 1990 and Gteborg, Sweden in 1995. This series of International Conferences on the acid rain problem has made a very important contribution to the process of summarising the state of current understanding and making this information available. In the 6th Conference approximately 600 papers were presented including talks and posters. About 300 peer reviewed papers from the presentation appear in this volume and will provide readers with a comprehensive review of the history and scientific aspects of the acid rain problem. The papers appear in three volumes: the first containing the plenary and keynote papers and the other two the remaining scientific papers. Volume 1 ISBN 0 7923 7132 1, Volume 2 ISBN 0 7923 7133 X, Volume 3 ISBN 0 7923 7134 8. The Conference was arranged under the joint auspices of The Science Council of Japan, The Japanese Society of Limnology, representative academic society, Japan Association of Aerosol Science and Technology, The Japan Society for Analytical Chemistry, Japan Society for Atmospheric Environment, Chemical Society of Japan, The Ecological Society of Japan, The Japanese Society of Environmental Education, Society of Environmental Science, Japan, The Japanese Forestry Society, Japanese Society of Snow and Ice, Japanese Society of Soil Science and Plant Nutrition and Japan Society on Water Environment with the cooperation of Ibaraki Prefecture and Japan Environment Agency.

Acid Rain Science and Politics in Japan Kenneth E. Wilkening, 2004-05-21 Acid Rain Science and Politics in Japan is a pioneering work in environmental and Asian history as well as an in depth analysis of the influence of science on domestic and international environmental politics. Kenneth Wilkening's

study also illuminates the global struggle to create sustainable societies The Meiji Restoration of 1868 ended Japan's era of isolation created self sufficiency and sustainability The opening of the country to Western ideas and technology not only brought pollution problems associated with industrialization including acid rain but also scientific techniques for understanding and combating them Wilkening identifies three pollution related sustainability crises in modern Japanese history copper mining in the late nineteenth and early twentieth centuries which spurred Japan's first acid rain research and policy initiatives horrendous post World War II domestic industrial pollution which resulted in a hidden acid rain problem and the present day global problem of transboundary pollution in which Japan is a victim of imported acid rain He traces the country's scientific and policy responses to these crises through six distinct periods related to acid rain problems and argues that Japan's leadership role in East Asian acid rain science and policy today can be explained in large part by the historical scientific momentum generated by efforts to confront the issue since 1868 reinforced by Japan's cultural affinity with rain its culture of rain Wilkening provides an overview of nature culture and the acid rain problem in Japan to complement the general set of concepts he develops to analyze the interface of science and politics in environmental policymaking He concludes with a discussion of lessons from Japan's experience that can be applied to the creation of sustainable societies worldwide

Schiermeier, 2012-12-06 Proceedings of the Twenty first NATO CCMS International Technical Meeting held in Baltimore Maryland November 6 10 1995 *Economic Policies for Sustainable Development* Thomas Sterner, 2012-12-06 This book focuses on describing policy instruments in different countries Its purpose is not only descriptive but also to some extent advocacy We believe that economic instruments can make an important contribution to an environmentally less disruptive path of development The design of economic instruments is however a fine art and depends among other things on their political acceptability and this acceptability is of course influenced by experience It is therefore important to provide information on the use of policy instruments in other countries Policies are currently developing quite fast and thus a book such as this one can inevitably not capture more than a snapshot view at a single moment of time We would hope that the book encourages more experimentation with economic instruments and that countries will make a fuller use of the whole arsenal of economic policy instruments If the book does succeed in this sense then it will soon become dated as policies change but that would be a price well worth paying The book combines a dozen country monographs together with a few international surveys on particular topics gasoline pricing vehicle regulations acid rain deforestation and global warming These papers are intended to illustrate the diversity of policy options available The actual policies adopted depend on economic as well as ecological conditions The country studies cover two Western countries and then concentrate on formerly planned and developing countries They show that economic instruments are still generally thought of as new and innovative

Greening Industrialization in Asian Transitional Economies A. P. J. Mol, Joost C. L. van Buuren, 2003-01-01 Studying transition economies is one of the most challenging tasks faced by those who wish to understand the political social and economic changes that the world has undergone since the end of the Cold War *Greening Industrialization in Asian Transitional Economies* is a collection of essays which examine environmental performance and the transition to market economies particularly in China and Vietnam A comprehensive assessment of the state of industrial environmental management this informative volume looks at the movement for cleaner production from many perspectives analyzing its historical roots its political influences its implementation and its economic and technological feasibility Readers of these excellent essays will be left with an in depth understanding of both the necessity for environmental improvements in rapidly industrializing economies and the difficulties and challenges which this goal entails An ambitious and important project *Greening Industrialization in Asian Transitional Economies* provides a wide ranging analysis of a vital topic *NAPAP Biennial Report to Congress* National Acid Precipitation Assessment Program (U.S.), 1999 *Life Cycle Assessment Handbook* Mary Ann Curran, 2012-11-07 The first book of its kind the *Life Cycle Assessment Handbook* A Guide for
