fiction as literary art The potential for rereading even when the reader remembers whodunit will be the basis for this distinction Leavy also looks closely at the Oedipus and Electra complexes and how they illuminate Rendell's portrayals of the different pairings within the nuclear family for example mother and daughter and considers the importance of gender differences In addition Leavy corrects a widespread error that Freud formulated the Electra complex when in fact the formulation was Jung's as he challenged Freud's emphasis on the Oedipus story as the essential paradigm for human psychological development
