History in Transit Dominick LaCapra, 2018-08-06 History in Transit comprises Dominick LaCapra's explorations of relationships he believes have been insufficiently theorized between experience and identity between history and various theories of subjectivity between extreme events and their representation between institutional structures and the kinds of knowledge produced within them Taken together these discussions form a dialogical encounter positing the links among epistemological questions historicist ones and issues pertaining to disciplinary and institutional politics Reacting against the antitheoretical bias of some prominent historians LaCapra presents an alternative model of historiographical practice one in which emphases on plurality and hybridity are combined with the concept of historical experience For LaCapra experience emerges as a category both theoretically determined and anchored in the facticity of the everyday LaCapra tests the assumptions and implications of the way one approaches the past by looking to psychoanalysis to render more self-aware the relationship between the historian and his or her material He offers criticisms of assumptions held by practicing historians and theorists placing the study of history at the center of a larger argument about the role of the contemporary university Contesting both corporatization and claims that the university is in ruins LaCapra writes It is paradoxical that the demand to make the university conform to an ever increasing extent to a market or business model seems oblivious to the fact that the American university has probably been the most successful of its type in the world that students from other countries

disproportionately desire to study in it *Art of Illusion* Dan Karlholm,2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today [A History of the Quests for the Historical Jesus, Volume 2](#) Colin Brown,Craig A. Evans,2022-11-08 A comprehensive two volume reassessment of the quests for the historical Jesus that details their origins and underlying presuppositions as well as their ongoing influence on today s biblical and theological scholarship Jesus life and teaching is important to every question we ask about what we believe and why we believe it And yet there has never been common agreement about his identity intentions or teachings even among first century historians and scholars Throughout history different religious and philosophical traditions have attempted to claim Jesus and paint him in the cultural narratives of their heritage creating a labyrinth of conflicting ideas From the evolution of orthodoxy and quests before Albert Schweitzer s famous Old Quest to today s ongoing questions about criteria methods and sources *A History of the Quests for the Historical Jesus* not only chronicles the developments but lays the groundwork for the way forward The late Colin Brown brings his scholarly prowess in both theology and biblical studies to bear on the subject assessing not only the historical and exegetical nuts and bolts of the debate about Jesus of Nazareth but also its philosophical sociological and theological underpinnings Instead of seeking a bedrock of facts Brown stresses the role of hermeneutics in formulating questions and seeking answers Colin Brown was almost finished with the manuscript at the time of his passing in 2019 Brought to its final form by Craig A Evans this book promises to become the definitive history and assessment of the quests for the historical Jesus Volume One sold separately covers the period from the beginnings of Christianity to the end of World War II Volume Two covers the period from the post War era through contemporary debates

The School of Montaigne in Early Modern Europe Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of

scriptures and the book of nature were becoming more accessible through print and manuscript cultures. But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors. Montaigne enfranchised the unofficial reader/writer with liberties of judgement offered and taken in the specific historical conditions of his era. The study draws on new ways of approaching literary history through the history of the book and of reading. The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries. Close analysis of editions, paratexts, translations and annotated copies is informed by a distinct concept of the social context of a text. The concept is derived from anthropologist Alfred Gell's notion of the art nexus: the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds. Throughout the two volumes the focus is on the particular nexus in which a copy, an edition, an extract is embedded and on the way that nexus might be described by early modern people.

Mapping Postcommunist Cultures Vitaly Chernetsky, 2007-01-08. In *Mapping Postcommunist Cultures* Chernetsky argues that Russia and Ukraine exemplify the principal paradigms of post-Soviet cultural development. In Russia this has manifested itself in the subversive dismantling of the totalitarian linguistic regime and the foregrounding of previously marginalized subject positions. In Ukraine work in these areas shows how the traumas of centuries of colonial oppression are being overcome through the carnivalesque decrowning of ideological dogmas and an affirmation of a new type of community most recently demonstrated in the peaceful Orange Revolution of 2004. *Mapping Postcommunist Cultures* also critiques the neglect of the former communist world in current models of cultural globalization.

Critical Social Theory in Public Administration Richard C. Box, 2015-03-26. The essential premise of critical social theory is that contemporary society is neither democratic nor free but that modern global capitalism creates a citizenry satiated with consumer goods unaware of alternative ways of living. In the public sector critical theory suggests that governing systems are influenced if not controlled by the wealthy and powerful leaving public professionals to decide whether to serve those interests or the interests of a broader public. This book provides a framework for the application of critical social theory in public administration. Its goal is to encourage awareness among public administration scholars and practitioners of social conditions that tend to shape and constrain scholarship, practice, teaching and social change. At a time when concern for public interest and a civil society have largely been displaced by the goals of economic efficiency and the New Public Management, *Critical Social Theory in Public Administration* presents a viable alternative that incorporates the latest views of postmodern thinking with the central elements of critical social theory.
