That Greece Might Still be Free William St. Clair,2008 When in 1821 the Greeks rose in violent revolution against the rule of the Ottoman Turks waves of sympathy spread across Western Europe and the United States More than a thousand volunteers set out to fight for the cause The Philhellenes whether they set out to recreate the Athens of Pericles start a new crusade or make money out of a war all felt that Greece had unique claim on the sympathy of the world As Byron

wrote I dreamed that Greece might Still be Free and he died at Missolonghi trying to translate that dream into reality William St Clair s meticulously researched and highly readable account of their aspirations and experiences was hailed as definitive when it was first published Long out of print it remains the standard account of the Philhellenic movement and essential reading for any students of the Greek War of Independence Byron and European Romanticism Its relevance to more modern ethnic and religious conflicts is becoming increasingly appreciated by scholars worldwide This new and revised edition includes a new Introduction by Roderick Beaton an updated Bibliography and many new illustrations

Camera Graeca: Photographs, Narratives, Materialities Philip Carabott, Yannis Hamilakis, Eleni Papargyriou, 2016-03-09 While written sources on the history of Greece have been studied extensively no systematic attempt has been made to examine photography as an important cultural and material process This is surprising given that Modern Greece and photography are almost peers both are cultural products of the 1830s and both actively converse with modernity Camera Graeca Photographs Narratives Materialities fills this lacuna It is the first inter disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination in the consolidation of the nation building process and in the generation and dissemination of state propaganda At the same time it is argued that the photographic field constitutes a site of memory and counter memory where various social actors intervene actively and stake their discursive material and practical claims As such the volume will be of relevance to scholars and photographers worldwide The book is divided into four tightly integrated parts The first Imag in ing Greece shows that the consolidation of Greek national identity constituted a material cum representational process the projection of an imagery although some photographic production sits uneasily within the national canon and may even undermine it The second part Photographic narratives alternative histories demonstrates the narrative function of photographs in diary keeping and in photobooks It also examines the constitution of spectatorship through the combination of text and image and the role of photography as a process of materializing counter hegemonic discourses and practices The third part Photographic matter realities foregrounds the role of photography in materializing state propaganda national memory and war The final part Photographic ethnographies

"Turquerie and the Politics of Representation, 1728-1876" Nebahat Avcioglu, 2017-07-05 In this first full length study devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected images designs and constructions and links Western interest in the Ottoman Empire to notions of self representation and national politics In investigating why and to what effect Europeans turned to the Turk for inspiration Avcioglu provides a far reaching cultural reinterpretation of art and architecture in this period Presented as a series of case

studies focusing on three specific building types kiosks mosques and baths chosen on the basis that each represents the first full fledged manifestations of their respective genres to be constructed in Western Europe the study delves into the cultural politics of architectural forms and styles The author argues that the appropriation of those building types was neither accidental nor did it merely reflect European domination of another culture The process was essentially dialectical and contributed to transculturation in both the West and the East

Cities as Palimpsests?
Elizabeth Key Fowden, Suna Çağaptay, Edward Zychowicz-Coghill, Louise Blanke, 2022-02-24 The metaphor of the palimpsest has been increasingly invoked to conceptualize cities with deep living pasts This volume seeks to think through and beyond the logic of the palimpsest asking whether this fashionable trope slyly forces us to see contradiction where local inhabitants saw and see none to impose distinctions that satisfy our own assumptions about historical periodization and cultural practice but which bear little relation to the experience of ancient medieval or early modern persons Spanning the period from Constantine's foundation of a New Rome in the fourth century to the contemporary aftermath of the Lebanese civil war this book integrates perspectives from scholars typically separated by the disciplinary boundaries of late antique Islamic medieval Byzantine Ottoman and modern Middle Eastern studies but whose work is united by their study of a region characterized by resilience rather than rupture The volume includes an introduction and eighteen contributions from historians archaeologists and art historians who explore the historical and cultural complexity of eastern Mediterranean cities The authors highlight the effects of the multiple antiquities imagined and experienced by persons and groups who for generations made these cities home and also by travelers and other observers who passed through them The independent case studies are bound together by a shared concern to understand the many ways in which the cities' pasts live on in their presents

Historical Memory in Greece, 1821-1930
Christina Koulouri, 2022-08-19 This book presents a social and cultural history of collective memory in modern Greece during the first century of state independence contributing to the debate over the relationship between memory and identity It discusses how modern Greek society commemorated its distant and recent pasts both real and imagined namely antiquity Byzantium the Greek Revolution and the Asia Minor Catastrophe how cultural memory was shaped by the various war experiences victory defeat mass death and mourning refugeedom and how memory politics became arenas of social and political strife Historical painting monuments historical pageantry tableaux vivants national anniversaries performances of ancient drama and revivals of ancient games are analyzed as instances where the past was visualized represented performed and consumed An explosion in public history has taken place over the last decades around the world with a veritable flood of commemorations anniversaries and memory wars As more and more social groups claim the right to remember public discourse and polemics have arisen at the same time that traumatic memory has become a field of international academic research In the arena of public history historical memory is being constructed through the sentimental irrational reception of mythological narratives told through images

Newman University Church, Dublin
Niamh Bhalla, 2024-07-01 In 1854 John Henry Newman one of the foremost intellectual figures of the nineteenth century was

officially installed as the rector of the first Catholic university in Ireland University Church constructed in 1855 6 was Newman's first objective when he agreed to the rectorship and it can be considered as a tangible manifestation of the idea behind the unprecedented Catholic university in Dublin the posing of an erudite Catholic alternative to post Enlightenment secularism and Protestant hegemony through a style based analogy to the early Church Despite physically embodying what Newman wished to achieve in and through his new university this early Christian style church which drew upon Roman and Byzantine basilicas has received little attention This book charts for the first time the significant place that the building occupies within the history of Victorian revivalist architecture Niamh Bhalla explores the meaningful connection between the church's context and the ambiguity of its early Christian style In the intersection of these two things a significant monument was created The study of University Church therefore provides an effective lens to understand more comprehensively the architectural revivalism that dominated the nineteenth century particularly the first stirrings of basilican and Byzantine revivalist architectures in the British Isles Praise for Newman University Church Dublin Newman University Church Dublin is an important contribution to the burgeoning study of historicist architecture of the nineteenth century In studying the larger contexts of the church Niamh Bhalla illumines the aspirations of Cardinal Newman for the university that he directed and Catholicism in Ireland and the United Kingdom Robert S Nelson Yale University A riveting analysis of the University Church and its intellectual background Niamh Bhalla steers us effortlessly through the many strands of architectural and religious thought that lie behind Newman's church while revealing its seminal place in the history of the Byzantine revival Roger Stalley Trinity College Dublin

Environmental History in the Making Estelita Vaz, Cristina Joanaz de Melo, Lúcia M. Costa Pinto, 2016-10-13 This book is the product of the 2nd World Conference on Environmental History held in Guimarães Portugal in 2014 It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future It reveals how our cultural background and examples of past territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions Considering that political ideologies such as socialism and capitalism as well as religion fail to offer global paradigms for common ground an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to

overcome blocking factors real or invented and avoid repeating ecological loss Therefore agency environmental speech and historical research are urgently needed in order to sustain environmental paradigms and overcome political cultural and economic interests in the public arena This book intertwines reflections on our bonds with landscapes processes of natural and scientific transfer across the globe the changing of ecosystems the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources or as it in today's world can offer alternatives that avoid harming those same vital natural resources water soil and air In addition it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached from technical intervention in the world In short the book firstly studies the past approaching it as a data set of how the environment has shaped culture secondly seeks to understand the present and thirdly assesses future perspectives what to keep what to change and what to dream anew considering that conventional solutions have not sufficed to protect life on our planet
