Redwood Classic:

Redwood Classic Ralph Warren Andrews, 1958 This book is one man's memorial to the magnificent natural redwood Sequoia trees in California which today number only a fraction of the groves of 125 years ago Through outstanding photographs Ralph Andrews presents 239 different views of redwood trees three thousand years old on average at various stages of use Straight elegant trees are so wide 20 men touching fingers to fingers can stand around the trunk These trees were used to build lumbering empires and they kept thousands employed Many of the lumbermen themselves are quoted in memories of their work on the old trees hardships inventions earthquakes and fires sawmills logging camps and shipping are remembered Redwood Classic Ralph Andrews, 1987-01-01 **California Redwood (Classic Reprint)** Pacific Lumber Company, 2017-10-14 Excerpt from California Redwood It is estimated that there is standing today about 75 billion feet of Redwood timber At the present rate of production there is over a century's supply within this comparatively limited area in California Paradoxical as it may seem America's oldest tree is the least known and the last to be put to extensive use in the service of mankind It was not until 1850 that any Redwood was cut for the market About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Hearings United States. The Ghost Forest Greg King, 2023-06-06 The definitive story of the California redwoods their discovery and their exploitation as told by an activist who fought to protect their existence against those determined to cut them down Every year millions of tourists from around the world visit California s famous redwoods Yet few who strain their necks to glimpse the tops of the world s tallest trees understand how unlikely it is that these last isolated groves of giant trees still stand at all In this gripping historical memoir journalist and famed redwood activist Greg King examines how investors and a growing U S economy drove the timber industry to cut down all but 4 percent of the original two million acre redwood ecosystem King first examined redwood logging in the 1980s as an award winning reporter What he found in the woods convinced him to leap the line of neutrality and become an activist dedicated to saving the very last ancient redwood groves remaining in private hands The land grab began in 1849 when a green gold rush of migrants came to exploit the legendary redwoods that grew along the Russian River Several generations later in 1987 Greg King discovered and named

Headwaters Forest at 3 000 acres the largest ancient redwood habitat remaining outside of parks and he led the movement to save this grove After a decade of one of the longest most dramatic and violent environmental campaigns in US history in 1999 the state and federal governments protected Headwaters Forest The Ghost Forest explores a central question an overhanging mystery What was it like this botanical Elysium that grew only along the Northern California coast a forest so spectacular but also uniquely valuable as a cornerstone of American economic growth that in the end it would inspire life and death struggles Few but loggers and surveyors ever saw such magnificent trees ancient sentinels that like ghosts have informed King s understanding of the world On a lifelong journey King finds himself through the generations and through the trees A Next Big Idea Club Must Read Title
