Critical Musicological Reflections Stan Hawkins, 2016-04-22 This collection of original essays is in tribute to the work of Derek Scott on the occasion of his sixtieth birthday As one of the leading lights in Critical Musicology Scott has helped shape the epistemological direction for music research since the late 1980s There is no doubt that the path taken by the critical musicologist has been a tricky one leading to new conceptions interactions and heated debates during the past two decades Changes in musicology during the closing decades of the twentieth century prompted the establishment of new sets of theoretical methods that probed at the social and cultural relevance of music as much as its self referentiality All the scholars contributing to this book have played a role in the general paradigmatic shift that ensued in the wake of Kerman's call for change in the 1980s Setting out to address a range of approaches to theorizing music and promulgating modes of analysis across a wide range of repertoires the essays in this collection can be read as a coming of age of critical musicology through its active dialogue with other disciplines such as sociology feminism ethnomusicology history anthropology philosophy cultural studies aesthetics media studies film music studies and gender studies The volume provides music researchers and graduate students with an up to date authoritative reference to all matters dealing with the state of critical musicology today
