A Witch's Hand William E. Mitchell, 2024-05-29 William E Mitchell revisits his early fieldwork with a three part study of the history of colonial rule in Papua New Guinea From 1971 to 1972 William E Mitchell undertook fieldwork on suffering and

healing among the Lujere of Papua New Guinea s Upper Sepik River Basin At a time when it was not yet common to make colonial agencies a subject of anthropological study Mitchell carefully located his research on Lujere practices in the framework of a history of colonization that surrounded the Lujere with a shifting array of Western institutions dramatically changing their society forever Mitchell s work has been well known among anthropologists of Oceania but the material in this book has remained unpublished until now In this major new work Mitchell revisits his early fieldwork with a three part study of the history of colonial rule in the region the social organization of Lujere life at the time and the forms of affliction witchcraft and curing that preoccupied them Furthermore Mitchell offers the first sweeping cross cultural survey of sanguma magical murder in Oceania The book presents a vivid portrait of a society that has since changed dramatically as well as an approach to anthropology that was typical of the era This is a significant contribution to the ethnography of Papua New Guinea and is sure to be an invaluable source for researchers of Melanesia medical anthropologists and scholars of kinship myth and ritual

Tectonics of the Indonesian Region Warren Bell Hamilton,1979 **Geological Survey Professional Paper** ,1949 **U.S. Geological Survey Professional Paper** ,1979 Island Rivers John R. Wagner,Jerry K.

Jacka,2018-06-19 Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders but have had much less to say about the significance of rivers for Pacific island culture livelihood and identity The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers and the ways in which those attachments are changing in response to various forms of economic development and social change In addition to making a unique contribution to Pacific island ethnography the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity conflict pollution and the degradation of riparian environments afflict growing numbers of people Several authors take a political ecology approach to their topic but the emphasis here is less on hydro politics than on the cultural meaning of rivers to the communities we describe How has the cultural significance of rivers shifted as a result of colonisation development and nation building How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro power or polluted by mining activities How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place

Electromagnetic Coupling with a Collinear Array on a Two-layer Anisotropic Earth Jeffrey C. Wynn,1979 A study of the effects of electromagnetic coupling in dipole dipole and pole dipole induced polarization field measurements with evaluation of a coupling removal technique Sensual Relations David Howes,2010-02-22 Offers a full bodied approach to the study of culture in which each sense serves as a potent register of meaning *The Oxford History of the British Empire: Volume V: Historiography* Robin Winks,1999-10-21 The Oxford History of the British Empire is a major new assessment of

the Empire in the light of recent scholarship and the progressive opening of historical records From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth British imperialism was a catalyst for far reaching change The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning the meaning of British imperialism for the ruled as well as for the rulers and the significance of the British Empire as a theme in world history This fifth and final volume shows how opinions have changed dramatically over the generations about the nature role and value of imperialism generally and the British Empire more specifically The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire the pressure of current events access to primary sources the creation of relevant university chairs the rise of nationalism in former colonies decolonization and the Cold War They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide ranging enquiry about international relations the uses of power and impacts and counterimpacts between settler groups and native peoples The result is a thought provoking cultural and intellectual inquiry into how we understand the past and whether this understanding might affect the way we behave in the future **Documentary Screens** Keith Beattie, 2017-04-29

Documentary productions encompass remarkable representations of surprising realities How do documentaries achieve their ends What types of documentaries are there What factors are implicated in their production Such questions animate this engaging study Documentary Screens is a comprehensive and critical study of the formal features and histories of central categories of documentary film and television Among the categories examined are autobiographical indigenous and ethnographic documentary compilation films direct cinema and cinema verite and television documentary journalism The book also considers recent so called popular factual entertainment and the future of documentary film television and new media This provocative and accessible analysis situates wide ranging examples from each category within the larger material forces which impact on documentary form and content The important connection between form content and context explored in the book constitutes a new and lively documentary studies approach to documentary representation Children of the Blood Bernard Juillerat, 2020-08-20 This fascinating book translated from the French explores the Yafar society a forest people living by shifting cultivation hunting and gathering Based on fifteen years of research it offers a detailed examination of all aspects of a society whose material and nutritional relations with their rainforest environment are mediated by a sociocultural system based on a carefully negotiated relationship with natural forces and harmony between the sexes The author shows how these basic ideas can be found in the ritualized and institutional aspects of the Yafar s social life as well as their mythology Rich in detail and insight this book fully documents the Yafar s complex ritual involving a symbolic exchange with the spirit world a secret cult and curing rites presided over by hereditary religious officials The author s analysis of Yafar ideologies reveals that sexual reproduction is the key to their society and the model for continuity and regeneration

prescribed by nature **Gender in Amazonia and Melanesia** Thomas A. Gregor, Donald F. Tuzin, 2001-11-01 One of the great riddles of cultural history is the remarkable parallel that exists between the peoples of Amazonia and those of Melanesia. Although the two regions are separated by half a world in distance and at least 40 000 years of history, their cultures nonetheless reveal striking similarities in the areas of sex and gender. In both Amazonia and Melanesia, male-female differences infuse social organization and self-conception. They are the core of religion, symbolism and cosmology, and they permeate ideas about body imagery, procreation, growth, men's cults and rituals of initiation. The contributors to this innovative volume illuminate the various ways in which sex and gender are elaborated, obsessed over and internalized, shaping subjective experiences common to entire cultural regions and beyond. Through comparison of the life ways of Melanesia and Amazonia, the authors expand the study of gender as well as the comparative method in anthropology in new and rewarding directions.

Ritual Masks Henry Pernet, 2006-03-01 Ritual masking is an important institution in many traditional societies and has attracted much attention from Western scholars. In *Ritual Masks*, Pernet provides a thorough survey of masks and masking traditions in Africa, Oceania and the Americas based on a close analysis of the literature in several languages. Pernet's approach provides him with an opportunity to examine issues of importance to the history of religion and anthropology. These include the influence of theory on the interpretation of prehistoric documents, androcentrism in anthropology and the history of religions, and Western scholarship's recurrent problems in interpreting preliterate or traditional societies.
