Burke's Reflections on the Revolution in France (Routledge Library Editions: Political Science Volume 28) F. P. Lock, 2013-04-15 Edmund Burke's *Reflections on the Revolution in France* is one of the major texts in the western intellectual tradition. This book describes Burke's political and intellectual world, stressing the importance of the idea of property in Burke's thought. It then focuses more closely on Burke's personal and political situation in the late 1780s to explain how the *Reflections* came to be written. The central part of the study discusses the meaning and interpretation of the work. In the last part of the book, the author surveys the pamphlet controversy which the *Reflections* generated, paying particular attention to the most famous of the replies, Tom Paine's *Rights of Man*. It also examines the subsequent reputation of the *Reflections* from the 1790s to the modern day, noting how often Burke has fascinated even writers who have disliked his politics.

Children's Right to Freedom, Care and Enlightenment Bertram Bandman, 2013-10-28 Professor Bandman presents a philosophical argument in answer to the question: How do we justifiably bring up our children? Bandman suggests that the status of children's rights in collusion with the method by which children are raised result in the strength and breadth of our rights as adults. This is an eminently worthwhile study involving the interests of younger and older people alike, engaging us all in reflective examination of issues right at our doorsteps.

The Political Humanism of Hannah Arendt Michael H. McCarthy, 2012-08-17 At the end of the Second World War, when the horror of the Holocaust became known, Hannah Arendt committed herself to a work of remembrance and reflection. Intellectual integrity demanded that we comprehend and articulate the genesis and meaning of totalitarian terror. What earlier spiritual and moral collapse had made totalitarian regimes possible? What was the basis of their evident mass appeal? To what cultural resources and political institutions and traditions could we turn to prevent their recurrence? After years of profound study, Arendt concluded that the deepest crisis of the modern world was political and that the enduring appeal of political mass movements demonstrated how profound that crisis had become. For Arendt, the modern political crisis is also a crisis of humanism. The radical totalitarian experiment was rooted in two distorted images of the human being. The agents of terror believed in the limitless power generated by strategic organization, a power exercised without restraint and justified by appeal to historical necessity. The victims of terror, by contrast, were systematically dehumanized by the ruling ideology and then brutally deprived of their legal rights and their moral and existential dignity. Arendt's political humanism directly challenges both of these distorted images: the first because it dangerously inflates human power, the second because it deliberately subverts human freedom and agency. This book offers a dialectical account of the political crisis that Arendt identified and shows why her interpretation of that crisis is especially relevant today. The author also provides detailed analysis and appraisal of Arendt's political humanism, the revisionary anthropology she based on the politically engaged republican citizen. Finally, the work distinguishes the merits from the limitations of Arendt's genealogical critique of our tradition of political thought, showing that she tended to be right.

Dilley,2013-05-02 Darwinian Evolution and Classical Liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between Darwinian biology and classical liberalism Early chapters focus on classical thinkers like John Locke and Adam Smith while later chapters provide analyses of present day classical liberals focusing especially on F A Hayek Thomas Sowell and Larry Arnhart the most prominent advocates of contemporary classical liberalism Thematically the volume falls into three parts Part I examines foundational matters arguing that Darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy This section also contends that the free market s spontaneous order is fully compatible with a teleological or non Darwinian view of the universe Part II turns to contemporary applications contending that Darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family This section also argues that since its inception Darwinism has attenuated core tenets and values of classical liberalism and Western civilization Part III of the volume contains alternative views to those in the first two parts adding critical diversity to the book Respectively these chapters hold that Darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family **Culture and Social Theory** Aaron Bernard Wildavsky, These essays use a common interpretive framework to show how economic and other concepts are socially constructed how political philosophers and the workings of democracy can be understood and how rational choice theories might be given wider application and greater discriminatory power Aaron Wildavsky hoped that fellow social scientists would be persuaded of the

Ideology and Utopia in the Poetry of William Blake Nicholas M. Williams, 1998-04-13 Scholars have often drawn attention to William Blake's unusual sensitivity to his social context In this book Nicholas Williams situates Blake's thought historically by showing how through the decades of a long and productive career Blake consistently responded to the ideas writing and art of contemporaries Williams presents detailed readings of several of Blake's major poems alongside Rousseau's *Emile* Wollstonecraft's *Vindication of the Rights of Woman* Paine's *Rights of Man* Burke's *Reflections on the Revolution in France* and Robert Owen's *Utopian Experiments* In so doing he offers revealing new insights into key Blake texts and draws attention to their inclusion of notions of social determinism theories of ideology critique and Utopian traditions Williams argues that if we are truly to understand ideology as it relates to Blake we must understand the practical situation in which the ideological Blake found himself His study is a revealing commentary on the work of one of our most challenging poets
