Reflective Practice In Malaysi:

Reflective Practice in Malaysian Teacher Education Wai Heng Lee, Sok Khim Tan, 2004 This book explores how Malaysian student teachers practice reflection during their teaching practicum how practice contexts influenced their practices and which aspects of professional knowledge were constructed from their reflective practices It was found that there were two levels of reflective practices among student teachers The public level consisted of reflections through existing mechanisms post conference discussions post lesson analyses and weekly journals Reflections were very weak at this level At the private level student teachers reflected deeply upon their experiences They examined their own teaching their pupils and their beliefs or values about teaching However these reflections were not documented Reflections at this private level were rich and varied but they were not visible to the supervisors Two significant findings are that student teachers reflective practices lacked an element of inquiry and that reflective practices were carried out individual *Integrating High Impact Educational Practices for Malaysia: A Handbook of Reflective Practice and Professional Development (UUM Press)* Rosna Awang-Hashim, Mohammad Noman, 2023-02-20 High Impact Educational Practices HIEPs have been extensively tested as compelling pedagogies for university students from an array of backgrounds especially for the underprepared and those with limited opportunity for high impact learning experiences This handbook is written with our firm belief that while higher education practitioners around the world are focused on improving student outcomes not many have access to a better understanding of the conceptual foundations empirical research and best practices in student engagement and high impact educational pedagogies In this book we unpack the essential conceptual constructs around the notions of student engagement to encourage readers to purposefully add HIEPs to their pedagogical repertoire and engage in Scholarship of Teaching and Learning SoTL practices *Reconceptualising Reflection in Reflective Practice* Misrah Mohamed, Radzuwan Ab Rashid, 2023-05-10 This edited volume presents a model that embraces four components of reflective practice planning acting reflecting and evaluating The complexities of reflective practice are manifested through three aspects of reflection problem solving action orientedness and critical reflection To provide practical guidance the audience is presented with various sets of experiences within the field of education which represent different foci and criticality of reflection The experiences are described through different lenses from individual to groups of educators The chapters provide a reconceptualisation of reflection which underpins an effective reflective practice Therefore readers are provided with information that demonstrates the different phases of reflection that make up an effective cycle of reflective practice It is through the chapters that readers will be able to distinguish the different foci and levels of reflection thus enabling them to engage in reflective practice more effectively The Malaysian context that the book brings gives readers insights into a lesser known context and its people culture and educational system as a whole for comparison The book is written with the needs of student teachers and teacher educators in mind However the model reconceptualised is transferable to other disciplines too

Developing Reflective TESOL Practitioners Through Teacher Education Andrzej Cirocki, Mark Wyatt, Xuesong (Andy) Gao, 2024-06-26 This textbook provides insights from Asian contexts into how reflective practice is nurtured on Teaching English to Speakers of Other Languages TESOL and English Language Teaching ELT teacher education programmes There is

increasing recognition worldwide that given the centrality of reflective practice to teachers ongoing professional development supporting teachers to become reflective practitioners should be integral to teacher education programmes. Consequently tertiary level courses in areas such as TESOL and ELT tend to promote reflective practice supported by theoretical input from the burgeoning literature on reflection much of which is produced in the West. Relatively under represented in the literature are global perspectives on reflective practice there are consequently relatively few accounts as to how reflective practice is embedded in teacher education programmes in different parts of the world including Asia. Hence this book addresses a gap. Contributing authors from fourteen countries provide insights into the ways in which teachers are helped to grow as reflective practitioners on their teacher education programmes in their unique contexts. This textbook showcases how reflective teaching practices are developed supported by frameworks for critical reflection and in interaction with local educational policies. These distinctive accounts aid readers in reflecting on the ways in which reflective practice is supported in their own teacher education contexts and in considering ways of enhancing the reflective dimension of their programmes. This textbook showcases innovative reflective activities and can be used as a principal text or as supplemental reading on a range of TESOL and ELT teacher education courses.
